SCSEP Monthly All Grantee Call (AGC), November 19, 2025

Mauro, Kevin M - ETA CTR 0:03
Cameras are off, and you are currently muted. If you agree to being recorded at this time, you may turn on your camera or unmute yourself, at which time the agreement prompt will pop up on your screen where you can accept. I will give you all a moment to do that.

Mauro, Kevin M - ETA CTR 0:27
I also ask that if you've unmuted yourself to agree to being recorded, please re mute yourself at this time. As always, thank you for your cooperation. And now I'll hand it back to Toni to begin today's call.

Wilson, Toni K - SCSEP 0:40
Thank you so much, Kevin.
So once again, for those that just joined, I just wanted to start out by saying it's so good to see everyone, either their names or your faces out there.
I wanted to first just introduce who we have on the call.
We have our federal team, so Byron Kline, Ali Slaughter, Shawnte McGee. You guys can wave if you want and we'll hear for in a minute just from Steve Rietzke.
But before we do that.
We and then myself, Toni Wilson, the SCSEP Unit Chief.
We also have our technical assistance contractors on the line. You guys can give a wave. And then welcome back to our performance contractor, that's BCT and Charter Oaks. So, they will mainly be coming back aboard, and you'll see their names over the next month. But I know a few of them I believe have joined the call. So welcome back. We're glad to move forward with that. So, before I jump into kind of where we're at today and I know some of the frequently asked questions and performance and all things SCSEP related, I wanted to first just bring Steve Rietzke on who just wanted to greet you guys before we get started, Steve.

Rietzke, Steven - ETA 2:13
Sure. Thank you, Toni.
And it's really good to see all of you.
I appreciate you all being on this call today.
And you know, I just want to recognize like it's been an interesting year and I know that you know, I know that our team is really just getting back from quite a lengthy shutdown.

You know we haven't even been back at work a week yet.
You know we're glad to be here.
We're glad to see all of you and we really want to be as helpful as we can.
I want to acknowledge up front like I anticipate that you all are going to have or maybe have already asked a lot of questions that you know, you just sort of given where we are in the year and how much of the program year is left?
And you know, some of the operational realities that a lot of folks are up against.
They're all going to be good questions. We're not going to have the answers to everything right here right now.
I think we've had limited time to kind of dig into some of this since we've been back for shutdown.
So I know that the SCSEP team here is doing their best to come to the table with some of the answers and that we're going to have to kind of research a bit what some of the other answers are.
But you know, I appreciate everybody's resilience. I appreciate you tuning in to this call and I appreciate whatever questions you might bring to the table and we'll do our best to figure out what the answers are and get back to you.
In the meantime, you know, we look forward to working with you all and making program year 25 as strong as possible, so thanks for letting me just say a couple words up top.
And I'll turn it back to Toni to carry us through the rest of the agenda.

Wilson, Toni K - SCSEP 4:29
Thank you so much, Steve.
Definitely appreciate you.
Right. So, let's jump into our agenda so.
First we wanted to start out with just kind of a summary of where we're at.
So first of all, once again.

Wilson, Toni K - SCSEP 4:48
Thank. Just a reminder if you are not speaking, if you can please put your phones on mute.
Appreciate that.
So wanted to just thank everybody for their resilience during this time.
As Steve says, we're all working as quickly as possible to get your grant needs back up and fully functioning, and we really appreciate your patience during this time.
As of now, all States and territories have their funds and their grant packages were being reconciled before the shutdown and anything that's outstanding we are, we

meaning the FPO's and the Nationals are getting those reconciled now.
And for the nationals, all those grantees and set aside programs all should have their funds and grant packages are being reconciled over the next few weeks.
ATSS is definitely a priority.
I know we've gotten some phone calls in reference to the ATSS getting that cleared. If you had submitted an ATSS during the PY 24, as you know, through the TEGL that is good for the four years.
The only reason that you would need to submit a new ATSS in is if you are modifying or changing something and so we are quickly triaging to look at those immediately.
Because I know that that can hold up a lot of the program items, so we'll be getting those to you as soon as possible.
We are also aware of questions around extensions. Backpay, for those that were on furlough, I just wanted to let you know that we are aware of these questions.
We're looking into both of these questions, but right now there isn't any official extension or any official approval of back pay for furlough staff.
So for now, we need to plan forward as if there is no extension in place.
And if anything changes, we will let you know as that is on the review.
Another question we're hearing is around performance.
We've been getting a lot of questions in reference to, you know, will like goals be changed and kind of reflect our situation. And as with the other things we are reviewing that at this time and we'll provide, you know, further information at a later date.
The next one is the Section 512 report.
This, for those that are not familiar, this was what we previously called the Minority report.
It is now going forward called the Section 512 report.
You'll see that in our previous our most recent TEGL, which is the section the minority report is in, section 512.
So right now, when that went out, we did not ask for that data and I know we've been getting questions in reference to do they have to get that in to have their packages submitted?
And the answer is no.
So as right now, just get you know, if you were getting information in your grant submissions, we'll be asking for that data at a later time and it won't be any earlier than January. But we'll be collecting that data at a later date.
So we'll keep you posted on that and we'll definitely provide e-mail and lots of details at that time.
And then lastly, this is just more of a reminder that with GPMS and you'll hear from Ali.
So she'll let you know all things there and later down in our agenda.

But if you do have a help desk ticket for GPMS, please be reminded that the Zendesk is. We are closing that down, that is closed down. If you have sent one, we are kind of reviewing and clearing that out, but then it will be completely shut down.
And the process is that you log into GPMS and there's a section in GPMS where you can say help request and you can create a ticket. So and if for some reason you are not able to access GPMS or you don't have access you can ask one of your coworkers, they can submit one on your behalf.
And if none of that works, you can just contact our SCSEP technical assistance mailbox and we will help you in reference to submitting a ticket.
So I just wanted to flag that to making sure that people are using that proper way in reference to the help desk.
Alright, so I know people may have some other questions, so I'm going to ask that if you can put things in the chat.
Or just wait, we have a few other updates on the agenda and then we will move to Q&A.
So the chat or after we finish the performance aspect of it, we're gonna move to Q&A.
So with that said, I am going to pass this over to Byron, who is going to talk to.
Oh, I apologize, Byron.
I did have one more thing. Can't believe this is a big one.
The demonstration grants. I know there's a lot of questions around the demo grants and what's the status of that. We do plan and we're in the process of reviewing.
Remembering those are four year grant, but we definitely understand and reference to the delays.
So we are reviewing that and we'll be having a meeting in December to meet with those nine grantees on the next steps.
So just wanted to flag that it's still in play and we'll be providing some next steps in December.
Now, with that said, I am gonna pass it over to Byron.
Who's going to talk to us in reference to grant management updates? Byron.

Kline, Byron - ETA 10:59
Great. Thank you, Toni.
And just to echo what Steve said and also what Toni said, I want to thank all of you our grantees for your PY 25 grant submissions through Grants.Gov.
You may recall that back in September, in the interest of time, we initially asked everyone to submit just their budget documents.
Their SF424, their 424A and their budget narratives.
And we ask that you send that in advance of the entire application so we could begin processing them and making sure we just got you your money.

Now that most of our grantees, actually all of our grantees, have their funds, we're reiterating to all of you that may not have completed their entire application materials to now go ahead and submit any outstanding application materials.
Including any of your Optional Special Requests, otherwise known as our OSRs.
Any of those that you may want to implement.
Just as a quick refresher.
The OSR's are basically 7 categories of requests and options and waivers that we have that you can forward to us forward to us or our office.
The seven categories and I won't go into depth right now but I'll just mention them really quickly.
The first is the change to the 48 month individual durational limit waiver option.
That's the option that provides for a grant recipient to change their current individual durational limit their IDL policy.
Second and this is probably the one that you are most familiar with, the additional training and supportive services funds OSR that otherwise known as your ATSS.
This provides grant recipients with an exception to the 75% minimum level of expenditure on participant wages and fringe benefits PWFB.
With that, you are allowed to use no less than 65% of program funds for PWFB as opposed to the normal 75%.
Number three is the increase in administrative cost limitation that provides the option for grant recipient to increase their administrative costs to not more than 15%.
Next is the extension of average project duration.
This provides the option for Grant recipient to increase the maximum average participation duration length of participants time from 27 to 36 months.
OK, next is on the job experience.
OJE provides the option for Grant recipient to utilize OJE.
Number six, and this applies only to state grant recipients, is the cross-border agreements for state grant recipients only provides the option to enter into agreements to permit cross-border enrollment. OK and last but not least, rotation policy.
This provides the option to grant recipients to establish a policy of rotating participants.
To a new host agency or a different assignment within the current host agency.
OK, we can provide, and we've done in the past more detail about those. If you have questions, you can forward them to me.
I bring that up for this purpose.
At this point, as the SCSEP National Office team, we are now resuming our review of PY 25 grant submissions and we're going to continue to reach out to your FPOs to let them know the outcome of our grant package reviews.
And most importantly, whether there are any next steps required to finalize your

particular grantee submissions.
So what I mean by that is, there are examples of next steps that are required to finalize your submissions.
It could be a range of things.
For example, in looking at your budget, we may determine that we need more detail.
We need your missing a detailed budget.
So we may reach out to your FPO, who will in turn reach out to you to provide that.
In some cases you may be missing a work plan.
And again, we would reach out to your FPO who will get in touch with you to provide that. One that we see that is fairly common is after reading your ATSS submission, it may not be clear about you know how you, as the grantee, intend to use your ATSS funds.
You may have a great understanding of how you plan to do that, but in reading your submission, it may not be clear to us, so we may ask you to clarify it with an additional narrative.
So those are the types of things that we may ask for.
Again, we would get in touch with their FPO first and that'll determine what we need and we try to turn those around as quick as possible.
These are the types of questions that we may need answers to. Let me stop right there and ask if you have any immediate questions right now.
OK. There'll be time later on to ask questions, so if you have some, you can wait till later on in this presentation.
And I will send my e-mail, put my e-mail out there for you to forward them questions directly to me and I will make sure we, you know, get answers to your issues. All right.
Thank you. I'm gonna turn things back over to Toni.

Wilson, Toni K - SCSEP 17:18
Alright, thank you so much, Byron. And just as a reminder, as I said, we'll do Q&A at the end and you can also put those any questions that you have in the chat.
All right, so we are now going to move on to communications outreach and our training and TA and I will first start out with an update on our COP and I'm gonna pass this over to Kevin. Kevin Mauro.

Mauro, Kevin M - ETA CTR 17:47
Thanks, Toni, and thank you everyone for joining us today.
Again, I'm going to keep my update very brief.
We are still working on the COP for all of you, making sure we keep it up to date, keep it new and improved and all of the latest resources that are available, we make sure we

put onto the COP for you.
One thing I wanted to stress, given the sort of year that we've had is that if you have a new staff or staff, that is specifically looking for one of our resources, please send them to the COP, and if you can't find it there, please send us a message at to the SCSEP technical assistance mailbox and we'll be happy to find that resource for you and make sure we do have it published and that is the latest and greatest version.
But that's all the sort of updates I had this month.
I just wanted to say make sure you're coming to the COP and check it out for all the resources that you could possibly want.
I can take this opportunity to hand things over to my colleague Michi to talk about vLive.

McNeace, Meche - ETA CTR 18:56
Thanks Kevin.
Hi grantees.
It is so great to virtually be with you again. So, thank you guys for joining us today for our update for GPMS virtual office hours. We will be open for business next Wednesday, November 26th, normal Eastern Standard Time from 2:00 PM to 3:30 PM and so we will continue to encourage you all to stop by and hang out with us if needed.
And also to let you know that we will have our virtual office hours in December, which is scheduled for December 10th and also on December 24th with the 24th being a maybe due to the holidays.
So with that being said, that is all we have to speak on when it comes down to the GPMS office hours.
So with that being said, I'm gonna pass it back over to Toni.

Wilson, Toni K - SCSEP 19:52
Alright, thank you so much Michi.
Appreciate you and your team on the great work you've been doing on the vLive.
So thank you so much for that.
All right. We're gonna move to performance and have some of our performance updates. So, I am gonna pass this over to Ali Slaughter.

Slaughter, Alison S - ETA 20:12
Thank you, Toni. Good afternoon, everyone.
It is so wonderful to see your names pop out up on our screen.
My name is Ali Slaughter and I work in SCSEP with performance and reporting.
I just have a few updates for you all.
First we are working on getting our, you know GPMS system development work back up

and running and starting off where we back where we were in September.
So, please be patient with us as we work through that.
That also goes for our help request module.
Please submit all the tickets you have.
We are still working through the backlog tickets created during the lapse in appropriation, but we are trying to get to them as soon as possible, especially those requests to reactivate an account that may have system locked during the last few months. Like Toni mentioned, if you're unable to submit a ticket because you can't access the system you're trying to get back in, please have a coworker submit a ticket for you or you can reach out to our SCSEP technical assistance e-mail and they will submit a ticket on your behalf so we can make sure we can get you back in the system and if I could have a member of the SCSEP team pop that e-mail in the chat, that would be really helpful. Thank you.
Thanks Kevin.
You have. If you are a grantee administrator in GPMS, you've probably seen a few emails from us come out this week in relation to WIPS.
We are trying to get all of our PY 25 quarter one reports in the system.
There were some issues on the website.
Those were resolved.
There are also an issue in the GPMS side that we're working to resolve, but you are able to now go in and submit your QNR, your quarterly narrative report.
So please go in and submit that report by next Friday. As far as the performance report the QPR we need to first get the authorized positions and the modified positions into GPMS so that we can generate the files that need to get sent over to WIPS.
So we're asking that all grant administrators please go into the system and allocate their authorized positions by tomorrow, the end of day Thursday, so that we can get the modified positions in there as well. And then we will let you all know when your files will begin processing. If you are unsure how to allocate your positions or you need some assistance again, please reach out to SCSEP technical assistance and they can set up a call to help walk you through that process.
We'll start beginning tomorrow. If we don't see those allocations in the system, so please try to get that done as soon as possible.
And my last note, which Toni already alluded to a bit, is that we are very happy to share that we have our performance contractor BCT back with us at the National Office.
So you'll start seeing some familiar faces, both on calls and also in the help desk responding to tickets.
So we have help on the way and we are excited to have them back with us.
With that, I'll turn things back to Toni. Thank you.

Wilson, Toni K - SCSEP 23:18
All right.
Thank you so much, Ali. Though you can stick around because we're going to move to Q&A and we'll just kind of work our bottom up from for the moment. I see there's some performance questions here.
So I see Tammy said the national grantees just had authorized positions uploaded to GPMS yesterday. Will services and enrollments recorded on or after July 1st automatically record for PY 25?

Slaughter, Alison S - ETA 23:50
Good question Tammy. Authorized positions are not directly connected to uploading an enrollment so they even if the authorized positions weren't already there, you will still be able to any cases that you enroll will be counting towards PY 25.
We look at the enrollment date not directly at the authorized position, so there should be no issue with cases that were recorded with an enrollment date of July 1 or who received the services from July 1 on.

Wilson, Toni K - SCSEP 24:21
Alright. And the next one is where can we find a list of authorized positions by county?

Slaughter, Alison S - ETA 24:30
We provided those lists. So, they're in GPMS now under the admin console and manage your authorized position so you can view them there.
We also sent out those lists with the TEGL.
So they were sent out separately.
This with the state TEGL for States and Territories, and then that list was also shared when the change 1 TEGL came out. I can't find the question, but whoever asked that, feel free to.

Wilson, Toni K - SCSEP 24:57
That's Marissa.
Marissa, I'm sorry. No. Maura. Maura, right here.

Slaughter, Alison S - ETA 25:05
I will send you.
I can go ahead and send you that list, Maura, so that you can take a look at it in a spreadsheet format.

But I would encourage if you're a national grantee, check back around September 29th. That lists or September 30th, I believe is when that that list was sent out.

Wilson, Toni K - SCSEP 25:23
All right, all right.
And our next question is, will there be an e-mail sent once we can run our WIPS QPR?

Slaughter, Alison S - ETA 25:30
Yes, we will definitely send out that notification. And depending on timing, we'll also try to schedule a brief office hours. If folks have questions, they can jump in.

Wilson, Toni K - SCSEP 25:41
And sorry, just kinda keep you here for a bit.
Ali, can there be more than two grant administrators in GPMS?

Slaughter, Alison S - ETA 25:50
There can be three. Each grantee can have up to three grant administrators in the system.

Wilson, Toni K - SCSEP 25:57
OK.
And then we have a question for the QNR.
The save button was not activating after typing in the boxes. Do you have any idea on how to reconcile this issue?
We also noticed that the period performance dates on the reports were for the last program year. Will this be reconciled?

Slaughter, Alison S - ETA 26:18
Great question, Yvonne. If you can go ahead and submit or someone from the IPDC team, if you can submit a ticket, I can take a look at that.
That's the only report I've seen so far about issues with the QNR, so I'm hoping we can easily solve that.
As for the program dates, I think you may be referring to the addendum file.
If so, the label is incorrect.
It is capturing starting 7/1/25 to 9/30/25 but if you can also include that in your ticket, I can help answer that.
The addendum is reporting the correct quarter just the incorrect year is labeled on that.

But please, please reach out via the help request module and I can help you out individually.

Wilson, Toni K - SCSEP 27:05
All right.
Thank you so much, Ali.
We may have a few more performance things, but we're now moving into the some of the other items.
So there's a question here for you, Byron. If you would, once you receive questions from all SCSEP providers, could you turn them into an FAQ for others who may have the same questions, to read their responses?
So I will let you answer that though Byron, I know you've been working very hard in the background, putting that together, but you can provide a further update if you like.

Kline, Byron - ETA 27:35
Obviously this person was reading our minds.

Wilson, Toni K - SCSEP 27:37
Hey.

Kline, Byron - ETA 27:38
We are coming up with some FAQs that we can share with grantees where we are coming up with some similar resources for FPOs as well, but some that will be available.
That we will either post on or COP or distribute via e-mail.
They will include some things updates to things you have received in the past. For example, descriptions more in depth descriptions of the OSRs in fact.
While we're on this call, I've sent out a couple of definitions for people who have asked for them.
Those are the types of things that will include an FAQ.
With that said, if there's some other topics even beyond OSRs that you would like FAQ's on, please let me know some of them.
I'm sure we have planned and in the hopper.
But hearing from you will just make it easier for us to provide these kinds of resources.
And know where the gaps are in in terms of your knowledge of SCSEP. So, thank you for that.
We will get those out to you as soon as possible.

Wilson, Toni K - SCSEP 29:00
Thank you, Byron, and thank you.
That's a good question to make sure we let everybody know that.

Kline, Byron - ETA 29:05
Yep.

Wilson, Toni K - SCSEP 29:06
Also, I see a question here. Is there a regular meeting invite that gets sent for the COP meetings?
And if so, how can I get included on that list? So, I don't believe we have any COP meetings, so I'm not sure if that's what you're looking for. We have the vLive and then our All-Grantee meetings.
So Ricardo, I'll have you clarify if you meant something else, but if you are talking about the community of practice, we can put a link in there in the chat.
Kevin can do that if is if it isn't already in there, and that's something that you can go on for yourself. And as Kevin said, that's where we post lots of our resources.
You contact information is there.
That's where you can get information about GPMS, et cetera. So good.
Great resource and we hope everybody makes sure that they have that on their desktops.
All right. But you can.
Let's see if you. Here you go.
Yeah. So, you were talking about the I already remember.
Good. So, you should be all set.
But no, we don't have a meeting on it.
So no worries there.
Alright. Next question.
Let's see. Where am I?
Sorry.
Can you? Alright. We already got Byron's e-mail that's in there. So, we don't need that.
There's a question here on based on the late start date, can we start amendments to this year's grant funds?
So I probably would need a little clarity, Rita.
What do you mean by amendments?
So if you're referring to extensions, there are no extensions at this time.
We are reviewing and will let you know if that changes, but as of now no extensions

have been approved or authorized. Now if you have amendments on other items that you might need to kind of adjust budgets or ATSSs or things like that, then yes, all those amendments are appropriate.
Money shifted to sub. Yes, you can start.
You can start those types of amendments now.
So yes, thank you for that clarity.
Let's see. What else do we have here?
Sorry chat, I tried with my little check boxes to help me, but let's see.
Are grant documents due in 30 calendar days or business days?
So Leslie, they are due in 30 calendar days as in our TEGL we just say 30 days.
So unless we specify it's 30 calendar days, so they're due 30 calendar days.
Hopefully that answered your question.
And if not, you can just resubmit in the chat.
Uh, let's see.
Make sure I get this one.
And this one's done.
Let's see. Where are we?
Am I missing some?
Let me keep scrolling.
And yes, I know that there's new people.
So please, we have a whole resource here on acronyms.
I'm sorry for all of the alphabet soup, but we could probably add another hour on if we said everything a loud, so we encourage you to become familiar with that, but I will try to be mindful in reference to kind of at least starting out saying what the full thing is.
Let's see for the combined state plans.
We are in the process of reviewing and we'll let you know in reference to the SCSEP section.
I believe that it will remain the same, but we will let you know if and what updates there will be for this year.
So we'll be providing further guidance on that.
Let's see.
Good to see you, Joshua, as a lot of people have said in there. Let's see.
And hello. All right, I think I got.
Whoops there.
We're getting here.
Let's see.
Thank you, Michi.
I appreciate you submitting that.

Good point, Rita.
You're referring to state plans. If you have to put any kind of language about the American skilled again, yes, that's definitely on our radar and we'll make sure that's included in any information that we share.
The change one TEGL.
So we have TEGL 16 24 which we can put in the chat and then the change that's for the state and the territories, which included the fact that you did not have to submit the Section 512 report and then the change one so TEGL 16 24 change one is the one for the Nationals and the Set Asides.
And so, thank you, Ali.
So both of those are in there.
Right.

Slaughter, Alison S - ETA 34:26
If I can jump in quick, there was a question about grant numbers in WIPS.
I did respond in the chat, but I just wanted to reiterate.
Thank you for the reminder on that question, Kristen.
You'll see that you'll only PY 24 grant numbers and WIPS.
That is correct.
We're going to be using the same number since we're in a four year grant cycle in WIPS between PY 24 and PY 27.
So when you're submitting, you should only have one option of a grant number to select.
It should start with 24 and that is the correct number, so make sure I'll reiterate that again via e-mail. But I just wanted to point that out. And I did think of one more thing I had forgotten earlier.
We did also ask a few grantees had new subs start between July 1 and now and we want to make sure we can get those in the system so that you can allocate correctly the authorized positions to those Subs.
So please submit a ticket with any sub grantee changes. The e-mail we sent yesterday asked for a few specific items in if you had sub grantees that retired, we won't act on that immediately.
We'll want to get through this first cycle of reporting, but we will sunset those sub grantees that may have stopped providing services. And so, you can create a ticket now and we'll walk that information and work with you to make sure all the participants and staff are transferred out of that sub grantee.
So again, if you have new Subs or you have Subs that have left, please create a help

desk ticket and we will work with you through that ticket.
Thank you.

Wilson, Toni K - SCSEP 35:57
Thank you so much, Ali.
All right.
So last call, if there are any questions anyone would like to either jump on the line with their question or put in the chat. But it looks like we've answered all the ones that are at least currently in the chat. I did want to whoops, I see we have one question.
Emmanuel, you are up.

Emmanuel Miller 36:21
I said good morning.
So, good afternoon and welcome back everybody.
I just want to confirm that in WIPS, the reason I'm unable to see a QPR or receive a QPR report or PY 25 is because the reports are not running authorized positions and modified slots and that's not a separate issue.

Slaughter, Alison S - ETA 36:45
That's correct.
So right now the addendum is not processing, it's not being sent to WIPS because there are no modified or authorized positions populated on the file.

Emmanuel Miller 36:46
Thank you.

Slaughter, Alison S - ETA 36:55
And so that's what we're trying to get into the system.
Once that's there, the file will send out and then you'll be able to also send out your WIPS QPR, but you can't do that until the addendum is processed.
So that's why we're working to get these in the system as soon as possible.

Wilson, Toni K - SCSEP 37:11
Thank you, Ali.
I see there's a question on if there are plans for a SCSEP conference in the upcoming programs year and if so, will the conference be held virtually or in person and any dates identified?
We currently do not have any dates identified and as part of our return, we're just kind of

regrouping on when would be best, but if, and when we do have one, it would be virtual, so no one would have to plan in reference to travel at this time. So, we will let you know as soon as we have any of those dates to share.
This might be performance.
I see that there's no data available due to empty data source applied filter selection criteria or fields visibility.
I don't know if that's, you're following that, Ali.

Slaughter, Alison S - ETA 38:07
This one.

Wilson, Toni K - SCSEP 38:08
If not, we might need a further explanation.

Slaughter, Alison S - ETA 38:11
Yeah, Luis, is that the message you get when you attempt to submit an addendum file?

Rodriguez, Luis 38:17
That's correct.

Slaughter, Alison S - ETA 38:17
I believe, OK. Yep, exactly.

Rodriguez, Luis 38:18
Yeah, when I do that part, just in case if anybody saw that in their report, they wouldn't freak out.

Slaughter, Alison S - ETA 38:25
Thank you.

Wilson, Toni K - SCSEP 38:25
Yeah.

Slaughter, Alison S - ETA 38:25
I appreciate it.
Yes and no. One has been able to get a file through, so it's not user error on anyone's part. We're just trying to get those positions in the system. Thanks Luis.

Wilson, Toni K - SCSEP 38:39
The last call for questions, but before we jump off, I did want to give everyone an opportunity. You know, if there's anything that you just wanted to, you know, let us just update in reference to how the how it's going in reference to getting by everybody back and onboard and just kind of how you guys are doing.
I just can't help that you know, we have our program stuff, but we also care and support about each other.
So I'm hoping everyone is doing OK.
And if anybody wanted to say anything, this would be an opportunity for that.
Well, no worries.
Hopefully everyone is.
There we go.
At least I got a light.
Hopefully everyone is transitioning.
Please know the FPO's are quickly working and will be.
If they haven't already reached out to you, they will be over the next few days.
And you know very good resource there. And then here at the national will be working on all the things that we had discussed through the beginning of this meeting and through the questions.
Let's see.
I love the good to see Steve back.
I'm not sure if he's still on, but I'm sure he will appreciate that he will be able to see the chat.

Rietzke, Steven - ETA 40:08
I am.

Wilson, Toni K - SCSEP 40:09
Oh good.

Rietzke, Steven - ETA 40:09
Thank you.
It's good to be here.

Wilson, Toni K - SCSEP 40:16
I think that, and you probably sum it up for a lot of us.
So thank you for that.

Appreciate it.
All right. Well, for now we do plan to have our next meeting in December. So hopefully we'll have some more updates for you by that point.
And so that'll be Wednesday, December 17th.
So we're gonna still keep that meeting. And as I said, we are, we'll be meeting for those nine for the demo just to get a check in and update and reference going forward.
And then we still have our vLives.
So we still have somewhat of a busy December.
And in the meantime, it's, you know, it's all about making sure that we're focusing on getting everybody's grant packages complete, answering any of the questions that you may have.
And then obviously all things performance.
So until next time. Thanks.
Thank you so much everyone for joining.
Once again, it is so good to see everybody and we will be talking.
Oops, I'm sorry. Before I jump off, it looks like there was a question.
Was there a question or just?

David Bassett 41:24
Yeah, I would just.
I would just.
I was just waving goodbye and I too am.

Wilson, Toni K - SCSEP 41:27
Oh, OK.

David Bassett 41:28
I, too am pleased to see everybody and thank you.
Thank you for your leadership we appreciate it and happy Thanksgiving to everybody.
While I have the floor.

Wilson, Toni K - SCSEP 41:38
Definitely, definitely happy, happy Thanksgiving.

David Bassett 41:39
Thank. Thank you.

Wilson, Toni K - SCSEP 41:41
Happy holidays to all and we will see you in December. Thanks again everyone.
