

SCSEP GPMS

Release Notes – Version 3.6

Release Date: July 2, 2025

GPMS Release 3.6 addresses new features, enhancements, and bug fixes discovered during the previous release.

New Features

- The MIN/WFA report now shows all exited participants with at least one waiver factor missing.
- The Urban-Rural selection is a required field if updating the zip code. If the urban/rural selection is changed from the system-determined value, the user must populate the reason for the change.
- Participant age is now verified based on the preliminary eligibility date.

Enhancements

- If the exit date is changed, the system recalculates the termination letter date to ensure it is 30 days from the exit date.
- The logic for PIRL 2832-2835 on the WIPS submission has been updated. These values now reflect community service hours only, and report four quarters of hours to provide an accurate rolling four-quarter view in WIPS.
- Updates made to ensure 508 compliance.

Fixes

- The WIPS addendum file no longer displays a negative average project duration.
- Program Analysts can now approve multi-transfer cases.

Known Issues

- The WIPS Addendum and QPR cards do not allow users to select 2024 Q4 – plan to address ASAP in a hot fix.
- Users are unable to add placements and receive an error message directing them to reach out to the System Administrator – plan to address ASAP in a hot fix.
- Some users are unable to move a participant from one sub-grantee to another sub-grantee within the same grantee. As we work to address the issue, please submit a Help Request Module ticket to request a move.
