

Participant Customer Satisfaction PY 2021

Grantee Report: National Older Worker Career Center

March 25, 2023

Overview

The participant customer satisfaction survey is one of three customer surveys used by SCSEP to assess the quality of the program's services and how those services relate to desired outcomes. The results from the participant, host agency, and employer surveys are provided to the grantees to help them identify the strengths and weaknesses of their programs and develop appropriate strategies for improving their services and meeting the specific needs of their three customer groups.

The nationwide participant survey for PY 2021 was conducted between April 2022 and September 2022. Of the 16,929 participants surveyed, 8,712 returned completed surveys¹, yielding a nationwide response rate of 51.5 percent. This response rate is significantly lower than the PY 2020 rate of 59.5 percent but higher than the response rate for PY 2019 of 50.4 percent.

A guide to interpreting your own grantee results is provided below, followed by your individual grantee results for all questions in Appendix A, your survey sample demographics and characteristics in Appendix B, and an analysis of the relationship between certain questions and your ACSI score in Appendix C. The report provides guidance in areas likely to be most useful to you in refining services and service delivery to meet participants' needs.

Guide for Interpreting Grantee Customer Satisfaction Survey Results

The following suggestions are intended as a guide for grantees to interpret and use their individual survey reports. Before looking at their own survey data, however, grantees should read the nationwide survey report and recommendations. This guidance is intended to focus grantees on key areas identified in the nationwide report that affect customer satisfaction and the quality of the program and that reflect the program's outcomes. After reviewing the nationwide analyses, grantees should look at their results in comparison to the nationwide analyses. The focus should be on program areas that are likely to provide grantees with the most benefit from program improvements.

¹ Completion of the survey means, at a minimum, that the respondent answered the first three questions that make up the American Customer Satisfaction Index.

Comparison to Nationwide Averages

General guidance. The first step is to review the ACSI score, the key measure of satisfaction. The ACSI tells the grantee about participants' overall satisfaction with the program, incorporating in a single number from 0-100 the overall assessment of the program, both quality and outcomes. This year's nationwide score is 85.9, significantly lower than the PY 2020 score of 87.2 but higher than most previous years. If your ACSI score is 85 or less, you should look carefully at your scores on questions other than the first three questions that make up the ACSI to see if there is evidence of weaknesses in particular areas.

The second step is to look at your scores on the key drivers discussed in the nationwide analyses: Questions 5, 6, and 18. Question 5 is the area of greatest strength. Question 18 is an area of some challenge, being the lowest scores among the key drivers. Question 6 is somewhere between the two and is an area of relative strength. If you have a score on one or more of these questions that is below the nationwide average for that question, you should consider ways to improve that area and related areas. Especially if you also have an ACSI score lower than the nationwide average, addressing improvements in any of these three areas is likely to improve both the particular program area and your overall satisfaction score as well. The table below provides your scores on these three questions and the nationwide scores.

		Areas of Strength		Area of Challenge
		5. At the time I enrolled, the SCSEP staff told me what I needed to know about how the program worked and what to expect.	6. The Older Worker Program/SCSEP staff gave me a host agency assignment that matched my employment interests and needs	18. Overall, how helpful has SCSEP been in preparing you for success in the workforce?
NOWCC	Mean	8.7	8.7	8.1
	Count	116	113	109
Nationwide	Mean	9.0	8.7	8.4
	Count	8609	8475	9199

The next step is to review your score on Question 11, having “a say in the types of skills I would gain during my host agency assignment.” Although this is not a strong, independent driver like the three questions above, it is highly correlated with overall satisfaction and has the lowest nationwide score (8.1) of any of the questions scored on a 1-10 scale. Moreover, there is approximately a 43-point difference in the ACSI score for those who felt they had the most say in their training and those who felt they had the least say. Preparing participants for the workforce involves giving them the right skills, and Questions 18 and 11 together suggest that providing the right skills must involve giving participants a say in identifying those skills most likely to prepare them for the workforce.

Comparison to Standards and to Self over Time

General guidance. Comparisons to standards should be used in conjunction with comparisons to nationwide averages. There are several types of standards:

- Fixed standards are a specific number chosen for its historical/community significance². The standard may then be considered a score below which you would not want to fall. Fixed standards can also suggest the lowest of what is acceptable.
 - Example 1: 1-10 ratings, converted to a grade standard would translate a score of 7.5 - 7.8 into a B-; anything below a B (7.8) suggests improvement is needed.
 - Example 2: An ACSI score (0-100) of 80 or 81 may be translated to a grade standard of B- and considered a standard for what is minimally acceptable.
- Relative standards are comparisons grantees can make with other industries. (See ACSI website for more information.)
- Relative standards based on the scores of specific peers can be used by an individual grantee to determine how far its score is from the best in its peer group. The grantee can decide which peers it most closely resembles.
- Relative standards can also be based on the average scores of peer groups. The nationwide report presents aggregate national grantee and state grantee scores. The grantee should use the appropriate group for comparison.

Ratings on questions with a 1-10 scale that are below 8.0 are generally “red flags.” ACSI scores (0-100 scale) below 81 are also “red flags.” These scores may point to areas where improvements would not only strengthen services but could also improve overall satisfaction with the program. Even if your ACSI score is at or slightly above the nationwide average of 87.2, you may still have some areas needing improvement. Similarly, if the rating for one or more of the key questions is above the cut-off point of 7.8, it may still be worth exploring the suggested improvement strategies, especially if that program area is a strong driver of satisfaction. We suggest paying particular attention to the corresponding sections in the nationwide report, comparing your scores to the nationwide scores, and using the guidance below for additional approaches to improvement.

In addition to the comparison of your own scores to the nationwide and standard scores, it is important to compare your current scores to your own scores for the last few years. A single point in time is often less informative than the trend over a number of years. Comparing your current scores with those for the same or substantially similar questions in the prior four years can be highly informative. Even if your scores are above the standard, a trend that is going in the wrong direction usually signals the need for a change in approach or at least recognition of the changing needs of participants. Alternatively, if you have implemented an improvement action and do not see an improvement in the score for the related question, you may need to investigate whether you implemented the change well or whether the improvement action you chose was the right response. Grantee level reports of the participant customer

² An historical/community standard is being an “A” student. Getting all “Cs” in school is associated with being average or not trying very hard.

satisfaction surveys for this year and the prior four years are available on the Older Workers Community of Practice.

Here are additional areas that warrant attention based on the nationwide report for PY 2021:

Preparation for employment. If your individual rating for Question 18 is less than 8.4 or if the percentage of your participants reporting in Question 20 that they did not feel prepared for employment in any sector is more than 8.5 percent, you will want to review the type of training you are providing to participants, the ways you can improve the quality of training, and the relevance of the training for your participants. This might include talking to some of your exiters and asking them to help you with improvements. Former participants are often the best source of new ideas and approaches. Another approach to improving low scores on training questions could be to check in at each assessment and IEP update with individual participants. Grantees can use these regularly scheduled IEP updates to explore what can be done to improve the entire program at the same time as they are revising IEPs for individual participants.

Also, do not forget computer training, Question 12. If a third of your participants or more report that they did not receive needed computer training or that the training did not meet their needs, take the time to understand the type and level of training participants need. Participants who do not receive the computer training they need have overall satisfaction scores 9-12 points lower than participants who do receive the training they need.

Supportive services. If 25 percent or more of respondents who needed supportive services gave Question 7 a rating of 1-5 on the 10-point scale, you can use the IEP strategy as suggested above for training. Since you may not have the resources for a full range of choices for or control over supportive services, you may not be able to address every situation. Nonetheless, there may be much to learn in many of these circumstances. You should also take advantage of the exit interview and Follow-ups 1 and 2 to assess the supportive services needs of participants entering or continuing in unsubsidized employment. A similar question was asked of host agencies so combining information from the participant and the host agency survey reports may provide additional insights.

Response rate. This year's higher than usual response rate is likely an anomaly related to the influence of COVID on participants. Therefore, we continue to stress the importance of achieving a 50 percent or higher response rate. If your response rate is below 50 percent, this should be particularly important to you. A response rate above 50 ensures that your scores are truly representative of your own participants; with too few responses, your scores may not be as useful as they would be otherwise. Grantees have a fair degree of control over the response rate. They should take advantage of regular opportunities within the program, such as orientation, review of IEPs, recertification, and exit interviews, to remind participants of the surveys and their importance as a consistent and valuable form of feedback to help improve your program. Grantees should also be diligent in sending pre-survey letters to participants as instructed by DOL.

Appendix A: Grantee Tables

Table 1. Response Rate

	Count	Percent
Response Rate Did not respond	161	58.1%
Responded	116	41.9%

Table 2. ACSI

	Count	Mean	Minimum	Maximum
ACSI	116	83.5	.00	100.00

Table 3. Reasons for Enrolling

	Count	Percent of All Responses
4. The primary reason(s) I enrolled in the Older Worker Program/SCSEP were to:		
4a. Obtain a full-time job after completing the program	22	5.4%
4b. Obtain a part-time job after completing the program	68	16.8%
4c. Participate in the program's training and host agency activities	48	11.9%
4d. Provide service to my community	66	16.3%
4e. Meet new people	44	10.9%
4f. Increase my income	75	18.6%
4g. Feel more useful and independent	68	16.8%
4h. Other	13	3.2%

Table 4. Treatment of Participants

	Count	Mean	Minimum	Maximum
5. At the time I enrolled, the Older Worker Program/SCSEP staff told me what I needed to know about how the program worked and what to expect.	116	8.7	1	10
6. The Older Worker Program/SCSEP staff gave me a host agency assignment that matched my employment interests and needs.	113	8.7	1	10
9. There is someone in the Older Worker Program I can talk to when I need to.	107	8.1	1	10

Table 5. Supportive Services

		Count	Percent
7. The Older Worker Program/SCSEP helped me obtain the supportive services that I needed to meet my employment goals.	1 Strongly disagree	11	9.7%
	2	2	1.8%
	3	1	0.9%
	4	3	2.7%
	5	6	5.3%
	6	2	1.8%
	7	5	4.4%
	8	8	7.1%
	9	5	4.4%
	10 Strongly agree	26	23.0%
	Did not need support	44	38.9%
	Total	113	100.0%

Table 6. Geographic Convenience

		Count	Percent
8. Given your transportation situation, was your host agency assignment convenient to where you live?	Yes	93	93.9%
	No	6	6.1%

Table 7. Host Agency Experience

	Count	Mean	Minimum	Maximum
10. During my community service assignment, my host agency gave me the training I needed to be successful in my assignment.	105	8.4	1	10
11. I had a say in the types of skills I would gain during my host agency assignment.	105	7.9	1	10
13. I feel comfortable at my host agency assignment.	110	8.6	1	10

Table 8. Computer Training

		Count	Percent
12. Which of the following best describes your experience with computer training?	I received the computer training I needed	39	34.8%
	I received computer training, but it didn't meet my needs	9	8.0%
	I needed computer training, but little or none was offered	31	27.7%
	I didn't need computer training but was given the training anyway.	9	8.0%
	I didn't need computer training and didn't receive any	24	21.4%

Table 9. Physical Health

		Count	Percent
14. Compared to the time before you started working with the Older Worker Program/SCSEP would you say your physical health is better, worse, or about the same?	Better	32	29.9%
	Worse	11	10.3%
	About the same	64	59.8%
	Don't know	0	0.0%

Table 10. Outlook on Life

		Count	Percent
15. Compared to the time before you started working with the Older Worker Program/SCSEP how would you rate your outlook on life?	Much more negative	3	2.6%
	A little more negative	9	7.8%
	About the same	22	19.1%
	A little more positive	26	22.6%
	Much more positive	55	47.8%

Table 12. SCSEP Wages

	Count	Mean	Minimum	Maximum
16. The income I receive from the Older Worker Program/SCSEP is important for meeting my basic expenses.	115	8.6	1	10

Table 13. Pressure to Leave the Program

		Count	Percent
17. During my host agency assignment, the Older Worker Program/SCSEP staff pressured me to leave my host agency assignment for a job before I was ready.	Yes	4	3.5%
	No	65	57.5%
	Does not apply	44	38.9%

Table 14. Preparation for Success in the Workforce

	Count	Mean	Minimum	Maximum
18. Overall, how helpful has the Older Worker Program/SCSEP been in preparing you for success in the workforce?	109	8.1	1	10

Table 15. Help in Finding Employment

	Count	Mean	Minimum	Maximum
19. How much help did Older Worker Program/SCSEP staff give you in finding employment?	6	5.5	1	10

Table 16. Preparation for Employment

		Count	Percent of All Responses
20. Do you feel that your participation in the Older Worker Program prepared you for employment in these organizations?	20a. I felt prepared for employment in a nonprofit organization.	4	44.4%
	20b. I felt prepared for employment in a government organization	2	22.2%
	20c. I felt prepared for employment in a for-profit business	3	33.3%
	20d. I did not feel prepared for employment in any organization or business.	0	0.0%

Table 1. Gender, Race, Ethnicity, Education

		Count	Percent
Gender	Male	38	32.8%
	Female	78	67.2%
Race	White	108	96.4%
	Black	3	2.7%
	Asian	0	0.0%
	American Indian	0	0.0%
	Pacific Islander	1	0.9%
	Hispanic	13	11.2%
Ethnicity	Not Hispanic	103	88.8%
Education	Less than HS diploma	10	8.6%
	HS Diploma/GED	34	29.3%
	Some college	35	30.2%
	Vocational/Technical degree	0	0.0%
	Associate's degree	6	5.2%
	BA/BS	24	20.7%
	Bachelors Plus	7	6.0%

Table 2. Barriers to Employment

		Count	Percent
Disability	Yes	29	25.0%
	No	87	75.0%
LEP	Yes	1	0.9%
	No	115	99.1%
Low Literacy Skills	Yes	29	25.0%
	No	87	75.0%
Rural	Yes	4	3.4%
	No	112	96.6%
Poor Employment Prospects	Yes	112	96.6%
	No	4	3.4%
Homeless or at Risk	Yes	80	69.0%
	No	36	31.0%
Veteran	Yes	22	19.0%
	No	94	81.0%
Severe Disability	Yes	1	1.0%
	No	100	99.0%
Frail	Yes	0	0.0%
	No	100	100.0%
Old Enough for but Not Receiving Social Security	Yes	1	1.0%
	No	99	99.0%
Failed to Find Employment After WIOA Services	Yes	13	11.2%
	No	103	88.8%
Severely Limited Employment Prospects	Yes	25	25.0%
	No	75	75.0%
Seventy-five Plus	Yes	17	14.7%
	No	99	85.3%
Formerly Incarcerated	Yes	7	6.6%
	No	99	93.4%

Table 3. Average Barriers per Participant

	Count	Mean	Minimum	Maximum
