

Chemical Operators Certification

Between now and 2009 the chemical industry in Western Kentucky and Southern Illinois is going to experience a significant decrease in qualified chemical workers, with over 50% of the current workforce reaching retirement age. This will leave over 100 jobs in the area open and available within the next two years. That's why West Kentucky Community and Technical College and several industries in the Paducah and Calvert City areas have begun working collaboratively to ensure that there are qualified, hard working applicants to fill these positions. By completing the WKCTC Chemical Workers Certification Program you are well positioned for an interview at the area's top chemical employers, and are considered a Select Candidate.

Chemical Operators Certification Program—36 Credit Hours

Certification Topics Include:

Math
Chemistry
Physics
Team Dynamics
