Bioscience
Certificate

Have you considered a career in

Bioscience?

The goal of bioscience is to “develop solutions that sustain, restore and improve the quality with which humans, plants and animals function and utilize biological products”.

Bioscience companies are involved in production, research, development, consulting and testing. The industry extends across different markets and includes manufacturing, services, research and health care-related activities.

Together with BioOhio, Owens Community College is offering a new, 29-credit-hour certificate in this field. If accepted into the program, student tuition not covered by other state and federal funds will be covered by a federal grant.

This certificate is designed for individuals who want to advance within the field of Bio-Science. The goal of this certificate program is to prepare students for entry-level positions in biotech, agricultural biotech, medical and pharmaceutical companies. Students will be taught the basic concepts of Chemistry, Biology, Anatomy & Physiology, Microbiology & Immunology and Statistical Quality Control.

Curriculum includes:

- Chemistry, Biology, Microbiology & Immunology concepts & lab components
- Anatomy & Physiology and related lab components
- Biotechnology lab components
- Hands-on troubleshooting in the areas of computer hardware and software

This certificate will prepare you for careers in these fields:

- Pharmaceuticals and therapeutics
- Medical device and equipment manufacturers
- Research and development facilities

- Medical laboratories
- Diagnostic imaging centers
- Agriculture feedstock and chemicals
- And more.
