SUMMARY OF REGULATORY REQUIREMENTS FOR LABELING OF COSMETICS MARKETED IN THE U.S.

Cosmetics marketed in the United States must comply with The FD&C Act. This Act defines cosmetics as articles intended to be applied to the human body for cleansing, beautifying, promoting attractiveness, or altering the appearance without affecting the body's structure or functions. Cosmetics include skin creams, lotions, perfumes, lipsticks, fingernail polishes, eye and facial make-up preparations, shampoos, permanent waves, hair colors, toothpastes, deodorants, and any material intended for use as a component of a cosmetic product. Soap products consisting primarily of an alkali salt of fatty acid and making no label claim other than cleansing of the human body are not considered cosmetics under the law.

COSMETIC LABELING

Cosmetics distributed in the United States must comply with the labeling regulations published by the FDA under the authority of the FD&C Act and the FP&L Act.

1. The label statements required must appear on the inside as well as any outside container or wrapper.
2. FP&L Act requirements (ingredient labeling and net quantity of contents on the principal display panel) only apply to the label of the outer container. Cosmetics bearing false or misleading label statements or otherwise not labeled in accordance with these requirements may be considered misbranded and may be subject to regulatory action.

The Principal Display Panel (40% of label area)

3. The principal display panel (the part of the label most likely displayed or examined under customary conditions of display for sale) must
    a. state the name of the product
    b. identify by descriptive name or illustration the nature or use of the product
    c. Bear an accurate statement of the net quantity of contents of the cosmetic inside the package in terms of weight, measure, numerical count, or a combination of numerical count and weight or measure.
        i. must be distinct, placed in the bottom area of the panel in line generally parallel to the base on which the package rests
        ii. Be in a type size commensurate with the size of the container as prescribed by regulation.
        iii. The net quantity of contents must be in terms of the U.S. gallon, quart, pint, and fluid ounce. The net quantity of contents may additionally be stated in terms of the metric system of weights or measures.

The Information Panel (60% of label area)

4. The name and place of business of the firm marketing the product must be stated on an information panel of the label.
    a. The address must state the street address, city, state, and zip code. If listed in a current city or telephone directory, the street address may be omitted. If the distributor is not the manufacturer or packer, this fact must be stated on the label by the qualifying phrase "Manufactured for ....." or "Distributed by ....." or similar, appropriate wording.

5. DECLARATION OF INGREDIENTS
    a. The letters must not be less than 1/16 of an inch in height.
    b. If the total package surface available to bear labeling is less than 12 square inches, the letters must not be less than 1/32 of an inch in height. Off-package ingredient labeling is permitted if the cosmetic is held in tightly compartmented trays or racks, it is not enclosed in a folding carton, and the package surface area is less than 12 square inches.
    c. The ingredients must be declared in descending order of predominance. Color additives and ingredients present at one percent or less may be declared without regard for predominance.
    d. The ingredients must be identified by the names established or adopted by regulation; those accepted by the FDA as exempt from public disclosure may be stated as "and other ingredients".
        i. For oils or other natural ingredients, the INCI name should be used, the common name can be included in parenthesis
    e. Cosmetics which are also drugs must first identify the drug ingredient(s) as "active ingredient(s)" before listing the cosmetic ingredients.
    f. All label statements required by regulation must be in the English language and must be placed on the label so that they are readily noticed and understood by consumers under customary conditions of purchase.
