1. Mass is defined as
   a. The space something takes up.
   b. Amount of matter in something.
   c. How much stuff is packed into a certain amount of space.
   d. Mass per unit volume
   e. C and d
   f. All of the above

2. Density is defined as
   a. The space something takes up.
   b. Amount of matter in something.
   c. How much stuff is packed into a certain amount of space.
   d. Mass per unit volume
   e. C and d
   f. All of the above

3. Zeros are significant digits when they
   a. Are at the end of a number AND after the decimal
   b. Are between two other significant digits
   c. Are before the decimal point.
   d. Zeros are never significant.
   e. Are at the end of a number **without** a decimal.
   f. Both a and b
   g. Both c and e

4. A unit for measuring mass is
   a. Gram b. millileter c. centimeter d. gram/mL

5. Density is measured with
   a. A graduated cylinder
   b. A scale
   c. A ruler
   d. It can't be measured, you have to calculate it.

6. Each different substance in the universe has its own unique
   a. Mass b. Volume c. sig dig d. Density e. scientific notation

7. The **meniscus** is
   a. a tool for measuring mass
   b. a tool for measuring volume
   c. a tool for measuring density
   d. a drop of water
   e. the curve at the top of the water

8. When measuring the volume of water, you should measure at the _____ of the curve at the top of the water.
   a. Top b. middle c. bottom d. side e. it doesn't matter

9. In the metric system, the symbol **k** stands for
   a. milli b. centi c. deci d. Deka e. Kilo f. hecto

10. In the metric system, the symbol **d** stands for
    a. milli b. centi c. deci d. Deka e. Kilo f. hecto

11. In the metric system, the value of **h** equals
    a. 1000 b. 100 c. 10 d. 1 e. 0.1 f. 0.01 g. 0.001

12. In the metric system, the value of **d** equals
    a. 1000 b. 100 c. 10 d. 1 e. 0.1 f. 0.01 g. 0.001

13. How many significant digits are in 27800 ?
    a. 5 b. 4 c. 3 d. 2 e. 1 f. 0

14. How many significant digits are in 0.034 ?
    a. 5 b. 4 c. 3 d. 2 e. 1 f. 0

15. How many significant digits are in 6.30 ?
    a. 5 b. 4 c. 3 d. 2 e. 1 f. 0

16. Write the mass of a helium atom in scientific notation.
0.000 000 000 000 000 000 000 006 667 g

17. Write 54809 in scientific notation.

Give the value (take OUT of scientific notation or expand)

18. of **4 X 10^{1}** mph (the average speed of a sneeze)

19. of **1.5 X 10^{-5}** m (the diameter of an average grain of sand)

Perform the calculation and **round of your answer to the appropriate number of significant digits.**

20. 55.0 x 2.0
21. 10.00 – 4.500

Convert the following

22. 10 g = _____ mg
23. 10 g = _____ kg
24. 1.5 x **10^{-2}** m = _____ cm
25. 1.5 x **10^{+2}** m = _____ hm

Name _____ date _____ period _____

Answer Sheet Measurement & Math Skills Test Form D

Multiple Choice

1. **a b c d e f g**	6. **a b c d e f g**	11. **a b c d e f g**
2. **a b c d e f g**	7. **a b c d e f g**	12. **a b c d e f g**
3. **a b c d e f g**	8. **a b c d e f g**	13. **a b c d e f g**
4. **a b c d e f g**	9. **a b c d e f g**	14. **a b c d e f g**
5. **a b c d e f g**	10. **a b c d e f g**	15. **a b c d e f g**

Write in scientific notation.

16. _____ = **0.000 000 000 000 000 000 000 006 667 g (**the mass of a helium atom in)

17. _____ = 54809

Give the value (take OUT of scientific notation or expand)

18. _____ = 4×10^{1} mph (the average speed of a sneeze)

19. _____ = 1.5×10^{-5} m (the diameter of an average grain of sand)

Show your work on 20 - 25

Perform the calculation and **round of your answer to the appropriate number of significant digits.**

20. _____ = 55.0 x 2.0

21. _____ = 10.00 – 4.500

Convert the following

22. 10 g = _____ mg

23. 10 g = _____ kg

24. 1.5 x $\mathbf{10^{-2}}$ m = _____ cm

25. 1.5 x $\mathbf{10^{+2}}$ m = _____ hm
