Key contact involved in developing the product(s): Brian Hall; 5421 E. 32nd Place, Tulsa, OK, 74135; (918) 282-4629; bhall.tulsacc@gmail.com

Product Name: Breaking the Cycle Replication Guide

Product Number: Grant Product #2

Product Type: Program Management & Implementation Tools

Complete Product Description: Wavebreak is the answer to Information Technology's education latency challenges. Due to the nature of the technology adoption lifecycle, technology education is all too often unable to keep up with its constant evolution, leaving relevant instruction stranded on the beach, while new waves of technology are constantly emerging. The Wavebreak Program brings to the future and current IT workforce an introduction to new technologies as they surface, allowing them to be more competitive in a rapidly evolving job market.

The "Breaking the Cycle Replication Guide" explains the steps for re-creating the Wavebreak program for use in other areas of the institution or separate institutions altogether. The guide covers the program's training options, participant data collection, purchasing and procurement, sustainability, performance outcomes including lessons learned and major challenges, external reviews of the program, and sample forms/reports used during the implementation of the program.
