Don't want to be trapped behind a desk? Good with your hands? Are you technology-savvy? Want to earn a high annual wage as much as \$56,000? A career in the energy industry may be just what you are looking for .... Whether you're just starting your education or looking for a new career opportunity, an education at Ivy Tech Community College gives you the power to change your life.

Realizing a maturing workforce set to retire over the next 10 to 15 years, the Indiana Energy Consortium was formed in 2007 to promote jobs in the energy industry in Indiana and fill the pipeline with energized, educated and skilled individuals.

In partnership with Ivy Tech, the Consortium developed three energy concentrations housed under the Industrial Technology program, in which you can obtain an Associate of Applied Science degree or Career Development Certificates in the following:

- Power Plant Technology
- Natural Gas Technology
- Electric Line Construction

In as little as one year, Ivy Tech Community College can get you started on a career that will energize your future.
