Types of Tools for Pages and Links in WebCT©

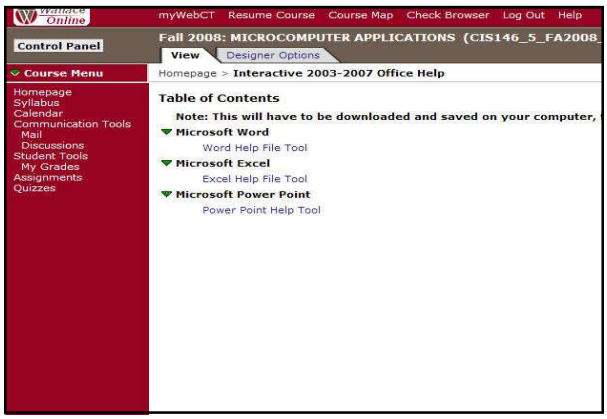

There are several types of pages and links that can be used to display information in WebCT©. It can be confusing about which one to use for adding content to your course. The differences among these tools can be quite significant, so an understanding of what they do will help you in choosing the correct one for adding content to your course. Below are descriptions of tools for pages and links in WebCT:

- **Organizer Page**: This tool is used to organize a group of related information onto one page for ease of use and access. This type of page can also be considered a second homepage for additional information like multiple topics for one chapter in a textbook.

Example of an Organizer Page

- **Content Module:** This is the most commonly used tool for loading information in WebCT©. Information can be loaded in the format of a table of contents that can consist of files, Web links, text, and other interactive tools. A content module can be thought of as a way "chunking" information into one area for the students. The content module page will also retain tracking information about student usage.

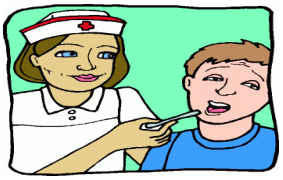

Example of an Content Module

Health Sciences Resource Center Software Spotlight

Med-Surg Mania software for Nursing includes quizzes covering anatomy & physiology, health problems, diagnostic and treatment procedures. Each topic is broken down into the following systems:

- Cardiovascular
- Endocrine
- Eye/Ear
- Gastrointestinal
- Genitourinary
- Hematologic
- Hepaticbiliary
- Musculoskeletal

Additional quizzes are included for Arterial Blood Gases and BSA/BMI.

If you are interested in using any of the Med-Surg Mania Software or would like to explore our other software for students, please contact Laricia Craig at Ext. 2504 or lcraig@wallace.edu.

Types of Tools for Pages and Links in WebCT© (Continued)

- **Single Page:** It consists of a single file under an icon in the course. This is usually located on the homepage or under a organizer page. This can consist of additional course information like the course outline or other content.

Single Page— Course Outline Icon

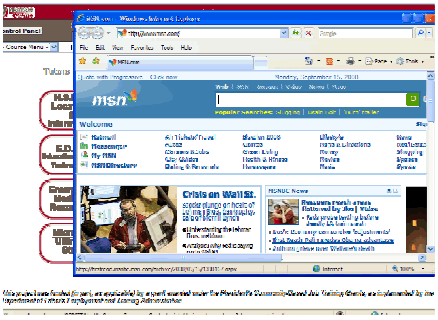

Single Page— Result of clicking on Course Outline Icon

- **URL:** A URL is a way to link to a video, Webpage, or anything Internet based that provides direction to additional resources outside the course. This type of link will open a new window to the outside resource.

URL— External Link to MSN Icon
