

Green Career Pathways

The **Local Economic & Employment Development Council's Green Career Pathways** program provides eligible individuals education, training and skills for work in the fields of home energy auditing, weatherization of existing buildings and installation of renewable energy technologies.

Green Career Pathways classes for 2011 will include:

- ◆ Home Energy Auditing for Building Performance;
- ◆ Skills for Weatherization & Energy Efficiency;
- ◆ Fundamentals of Solar Installation; and
- ◆ On-the-job training for qualified graduates on actual field-based projects with our *Green LEEDers* transitional jobs program.

Education includes relevant instruction in math, measurement and estimation.

Home energy auditing topics include:

- ◆ detection of safety & health hazards;
- ◆ "whole house" performance analysis;
- ◆ specification of energy-saving measures.

Hands-on skills training includes:

- ◆ use of blower door & infra-red imaging;
- ◆ combustion appliance testing;
- ◆ task practice in air leak sealing;
- ◆ dense-pack insulation preparations;
- ◆ basics of solar system installations.

Field experiences are key segments of these trainings for entry to emerging occupations in the fields of building performance and renewable energy.

Cost: FREE to eligible applicants
