

Reentry Employment Opportunities (REO) Grantees Performance Management System (GPMS) Youth Grants - Data Dictionary and Logic Rules Program Year 2022 (PIRL 2021)

The REO GPMS is a web-based application used by Department of Labor (DOL) grant recipients to collect, process and report grant participant information related to program intake, services, outcomes and follow ups. The data and information from the REO GPMS are compiled into the Participant Individual Record Layout (PIRL) and transmitted to Workforce Integrated Performance System (WIPS) for generating Quarterly Performance Report (QPR). The QPR provides various performance indicators to measure and evaluate the utilization of the grants in assisting the justice-associated youth participants with obtaining gainful employment.

This data dictionary provides guidance for the DOL youth grant recipients with the validation and logic rules for collecting, processing, and reporting data using the REO GPMS. Most of the validation and logic rules (WIPS logic rules) defined in this data dictionary are already supported in the REO GPMS and used for guiding the grantee users. This document is divided into two sections:

- 1) REO GPMS Data Dictionary – to define the data elements, page/tab within the REO GPMS application, PIRL definitions, REO GPMS Validations, WIPS Validations
- 2) WIPS Logic Rules – logic rules defining the conditions and validations across various data elements of the REO GPMS

REO GPMS Data Dictionary

The REO GPMS data dictionary is defined in the table below for all applicable PIRL data elements. Each row in table maps the user interface fields in the REO GPMS with the PIRL data element and identifies the REO GPMS and WIPS validations. Each row of the data dictionary contains:

REO GPMS #/Tab: This column is the REO number of each data element and the tab on which the data element can be found in the REO GPMS.

ID = Program and Participant	WIOA = WIOA and Other Program	Assess-xxx = Assessments
Dem = Demographics	Crim Just = Criminal Justice	Out-xxx = Outcomes – Emp, Edu, Measu, Cred, Exit
Emp-Edu = Employ-Edu.	Core Ser = Services	Fw-up = Follow up
Pub-Asst = Public Program	Train Ser = Training #1, Training #2, Training #3	

PIRL #: This column is the PIRL number of the data element.

Format & Coding: This column describes the type and length of each data element and the specified format and value codes if applicable. The types include:

IN = Integer – whole numbers, followed by the maximum number of digits allowed
AN = Alpha-Numeric – text (numbers or letters), followed by number of characters allowed
DT = Date/Time – whole numbers, followed by a format (Y = year digit, M = month digit, D = day digit), e.g., YYYYMMDD = 20221231 (Dec. 31, 2022)
DE = Decimal – decimal numbers, followed by the number of digits (total and after the decimal), e.g., 8.2 = “555555.55” (dollars and cents)
0, X, A = placeholders representing a character in a format (0 = integer, X = letter or integer, A = letter), e.g., AAXX = “PY22”)

Note: If a row has REO-GPMS Element Name as “N/A”, that means that PIRL data element is not used in the REO GPMS for data collection. However, that PIRL data element is still valid for the REO grant.

WIPS Logic Rules

The WIPS is the Department of Labor’s data reporting portal. WIPS performs a series of automated edit checks on files uploaded to assure the quality of the data. These edit checks include logic rules to ensure that the values reported in related data elements are logically consistent with each other. The logic rules applicable to REO Grantees, are listed below in order of the PIRL numbers of the data elements to which they apply. DOL updates the logic rules on a regular basis, so grantees are encouraged to look for updates in the WIPS Newsletter (sent to the email addresses associated with their WIPS accounts) or to review a current list of WIPS Edit Checks maintained at <https://www.dol.gov/agencies/eta/performance/wips/editchecks>.

Grantees can use the “Find” function of the application used to view this document (e.g., Microsoft Word or Adobe Acrobat) to find a PIRL number in the following table. The “Find” function can typically be accessed through the application’s menus or by pressing the keyboard shortcut *Ctrl + f*.

Note: Visit the WIPS Performance Page for a current list of edit checks (applied after the publication date of July 2022) at <https://www.dol.gov/agencies/eta/performance/wips/editchecks>.

Step 1: Select duplicate rules, logical rule, or valid values.

Step 2: Open the corresponding document by selecting "Click to View (xlsx)".

Step 3: Sort the "Date Implemented" column in order of newest to oldest.

Step 4: Take note of any changes dated after July 1, 2022 that include REO Y (Youth) in the “Programs Affected” column.

Interpreting WIPS Logic Rules

In the REO GPMS, when grantees select the options and enter values those values are sent to WIPS in the order published in PIRL. WIPS Error Reports reference PIRL # corresponding to the values, rather than the text values. Grantees may refer to the REO GPMS Data Dictionary to find the text values associated with the PIRL # and the numeric codes found in WIPS error reports.

The logic rules only specify values that are *permitted*. WIPS Error Reports indicate the values that triggered errors, along with the PIRL numbers of the associated data elements, but the Error Reports do not explain what changes the grantees needs to make to correct the errors. *That is up to the grantee to determine.*

Here is an example of an Edit Check description based on one of the logic rules for data element PIRL 1801 “Date Attained Recognized Credential (WIOA)”:

- A) IF Type of Recognized Credential (WIOA) (PIRL 1800) is > 0, THEN Date Attained Recognized Credential (WIOA) (PIRL 1801) must be >= Date of Program Entry (WIOA) (PIRL 900)

This logic rule has a conditional statement with two main parts: IF **X** is true, THEN then **Y** must also be true. In this case, **X** = “Type of Recognized Credential (WIOA) (PIRL 1800) is > 0.” According to the Data Dictionary, PIRL 1800 “Type of Recognized Credential (WIOA)” is REO GPMS #O.9 in the REO GPMS. It can take on values from 0 to 7, where 0 = “No recognized credential” and 1 through 7 correspond to various types of credentials. Therefore, if the value is greater than 0, the participant must have achieved a recognized credential of some kind.

The **Y** in the conditional statement is “Date Attained Recognized Credential (WIOA) (PIRL 1801) must be >= Date of Program Entry (WIOA) (PIRL 900).” The data element titles are straightforward, and the Data Dictionary indicates that PIRL numbers 1801 and 900 equate to REO GPMS #O.10 and #9, respectively. One technique when dealing with dates is to replace logical operators, such as “>=”, with plain text equivalents. In this case, that gives us: Date Attained Recognized Credential must be the same as or later than the Date of Program Entry.

Putting the parts together results in a more easily understood interpretation of the logic rule: IF the participant attained a recognized credential (#O.9), THEN the date on which the participant attained the credential (#O.10) must the same as or later than the date the participant entered the program (#B).

This rule applies to PIRL 1801 “Date Attained Recognized Credential (WIOA),” but *the incorrect value could be in any of the three data elements* referenced in the description! That is why it is up to the grantee to determine how to correct the error.
