

A COLLECTION OF OCCUPATIONS

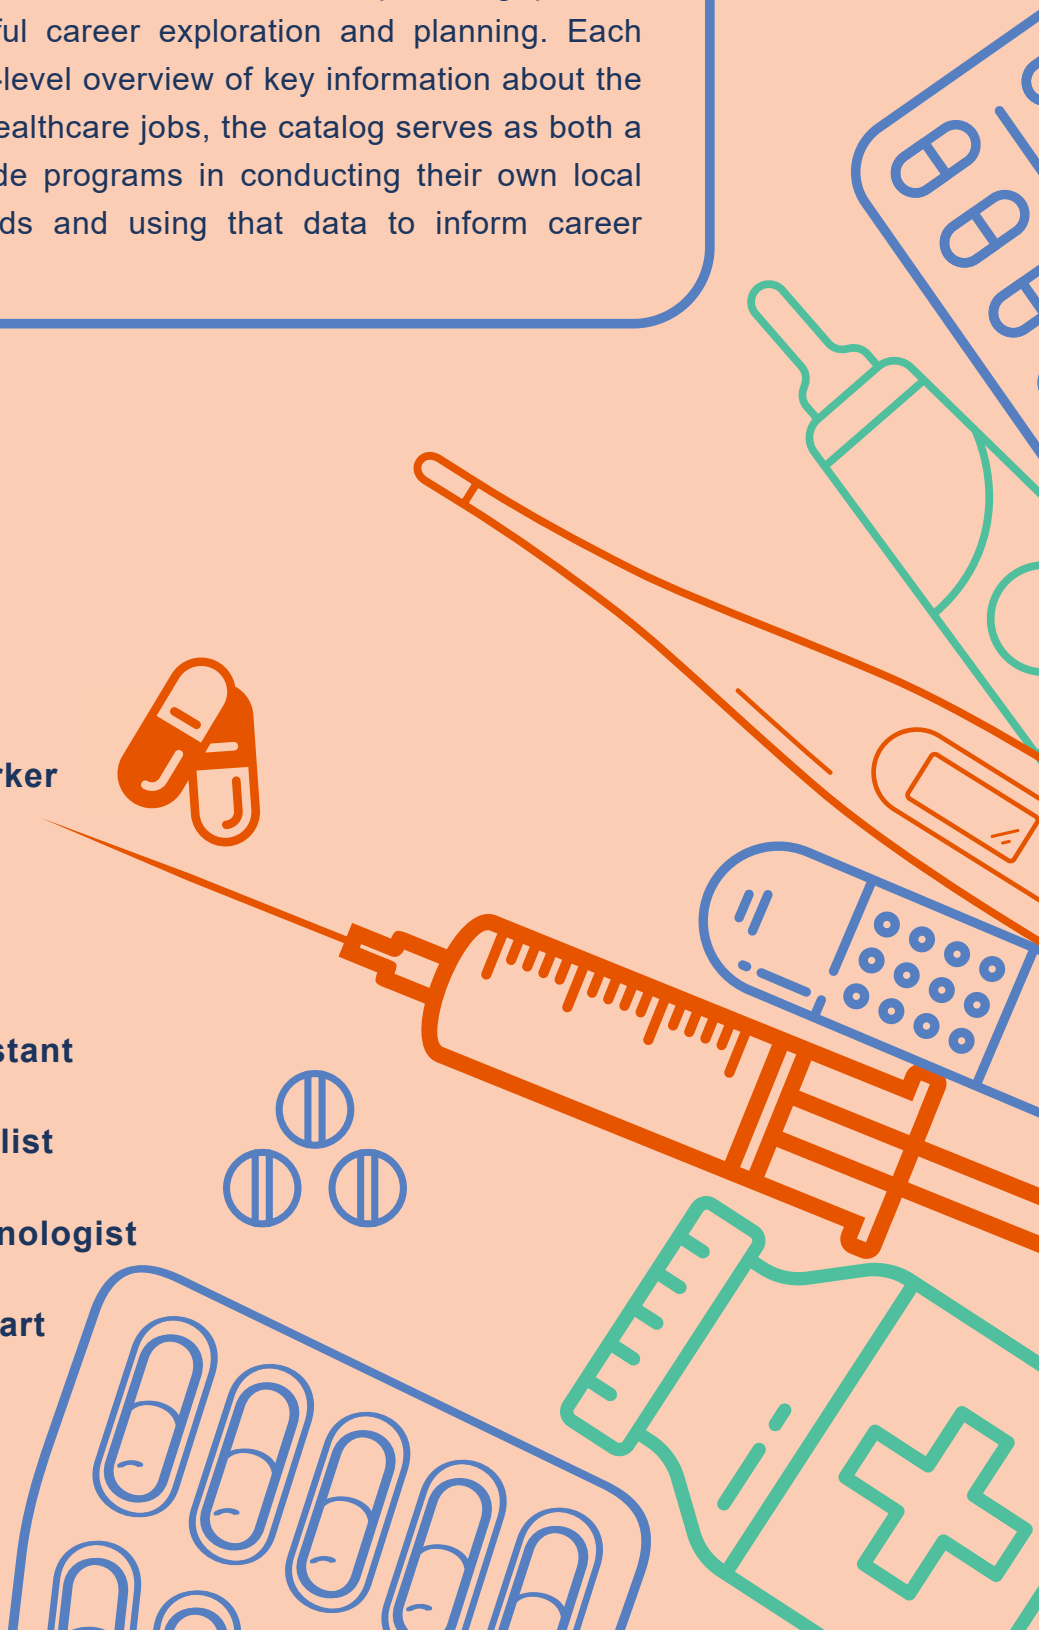

HEALTHCARE CATALOG

CONTENTS

This catalog highlights some of the country's most in-demand and accessible occupations within the healthcare sector, providing profiles designed to support meaningful career exploration and planning. Each occupation profile gives a high-level overview of key information about the job. While it doesn't cover all healthcare jobs, the catalog serves as both a reference and a model to guide programs in conducting their own local research into occupation trends and using that data to inform career exploration and planning.

INTRODUCTION

Exploring a new occupation is a journey.

Here are a few tips to help you get started:

ONE

Begin by discussing the job duties, pay, career options, and work environments of various occupations with young people to assess what aligns with their interests.

TWO

Be sure to research your state's education, training, certification, and licensure requirements for the occupation. States hold the authority to determine regulatory requirements for certain professions in healthcare, including the level of regulation (license, certification, etc.) and what is required to obtain that credential. Visit the [Licensing and Regulation – State Health Workforce Toolkit - National Governors Association](#) for more information. Each state has their own requirements and it is important to confirm the following with the appropriate state department:

Are there any state-approved or accredited training programs available?

What is the minimum number of training hours required? What is the required training format (e.g., classroom instruction, clinical hours)?

Is certification required by the state?

Is licensure required to work?

What exams must be passed to earn certification or licensure?

THREE

Learn the difference between certification and licensure. The Department of Labor defines the categories of “certification” vs “licensure” as: “Certifications are issued by a non-governmental certification body and convey that an individual has the knowledge or skill to perform a specific job. A license is awarded by a government agency and conveys a legal authority to work in an occupation.”

Certification is frequently utilized in one of two forms: state certification (e.g., CNA) and industry certification (e.g., Certified Phlebotomist).

SOURCE: LICENSING AND REGULATION -- STATE HEALTH WORKFORCE TOOLKIT -- NATIONAL GOVERNORS ASSOCIATION

FOUR

The best place to verify requirements is through your state departments. Each occupation profile lists specific departments to contact based on the occupation. These departments can provide information on state requirements and potentially direct you to approved training providers. Training providers will depend on the occupation, but it's common to find community colleges, vocational schools, hospitals, apprenticeship sponsors, or nursing homes offering healthcare training programs.

LOCAL RESEARCH GUIDE

While this catalog provides an overview of various occupations, you should supplement this information with additional research. Conducting your own research is important because the data, statistics, and requirements for each job may vary at your local level.

As you further explore these occupations, we suggest using the U.S. Bureau of Labor Statistics' **Occupational Outlook Handbook** and the **O*NET** occupation database to learn details specific to your state. This chart shows where you can find supplemental information using these suggested resources to accompany the information shared in each job profile.

 **NOTE:** The data shared in this catalog is constantly changing and updated by the Bureau of Labor Statistics regularly. Although these changes are typically seen in small increments, new technologies or policies can have a deeper impact on these statistical projections.

TYPE OF INFORMATION

WHEN YOU VISIT EACH JOB'S OCCUPATIONAL OUTLOOK HANDBOOK OR O*NET PAGE, YOU CAN FIND THE...

TYPICAL JOB DUTIES

...job duties information on the **What They Do** tab in the handbook and on the **Work Activities** section of the occupation's O*NET page.

...local wage data in the **Wages & Employment Trends** section of the occupation's O*NET page.

...work environment details under the **Work Environment** tab in the handbook page for the selected occupation.

SIMILAR JOBS

...similar job details under the **Similar Occupations** tab in the handbook.

EDUCATION, TRAINING, AND OTHER REQUIREMENTS

...education and training details under the **How to Become One** tab in the handbook.

...local training options and license requirements by entering your state or zip code under the **Training & Credentials** section of the occupation's O*NET page.

...state projected growth under the **Job Outlook** tab or in the **Wages & Employment Trends** section of the occupation's O*NET page select your state in the **State Trends** drop down box.

...additional information and professional associations under the **More Info** tab in the handbook and in the **Professional Associations** section of the occupation's O*NET page.

DENTAL ASSISTANT

DENTAL ASSISTANT

TYPICAL JOB DUTIES

- ✓ Prepare patients and the work area for treatments and procedures
- ✓ Schedule patient appointments
- ✓ Sterilize dental instruments
- ✓ Instruct patients in proper oral hygiene
- ✓ Hand instruments to dentists during procedures

NOTE: EACH STATE REGULATES THE SCOPE OF PRACTICE FOR DENTAL ASSISTANTS.

SIMILAR JOBS

Dental Hygienist

Individuals in this role may advance to a hygienist position. There may be opportunities in your state to expand responsibilities within the role, such as coronal polishing, which may require that you be licensed, registered, or hold certifications from the Dental Assisting National Board.

EDUCATION, TRAINING, AND OTHER REQUIREMENTS

There are several possible paths to becoming a dental assistant, depending on your state. Some states require assistants to graduate from an accredited program and pass an exam. In other states, there are no formal educational requirements, and dental assistants learn through on-the-job training. Some states require dental assistants to be licensed, registered, or certified for entry or advancement. When looking for an accredited program, ensure it is accredited through a state-approved agency or program like the [Commission on Dental Accreditation](#) (CODA). If your state allows assistants to perform expanded duties, such as coronal polishing, young people can look into certification from the Dental Assisting National Board (DANB).

For more information on how to become a certified dental assistant, visit the [Dental Assistants: Occupational Outlook Handbook](#). For specific state requirement information, please visit the [Dental Assistant National Board](#) and contact your state's Board of Dental Examiners to confirm these requirements.

TRAINING LENGTH

1 YEAR

Many programs take about one year to complete and lead to a certificate or diploma. Programs that last two years are less common and lead to an associate's degree.

Medical
Transcriptionist

Pharmacist

Pharmacy technicians can pursue various healthcare career paths, including transitioning into administrative roles like medical records specialist or medical transcriptionist with additional training, or advancing to licensed roles such as pharmacist, which requires a doctoral degree.

EDUCATION, TRAINING, AND OTHER REQUIREMENTS

Pharmacy technicians usually need a high school diploma or equivalent and learn their duties through on-the-job training, or they may complete a postsecondary education program in pharmacy technology. Most states regulate pharmacy technicians, which is a process that may require passing an exam or completing a formal education or training program.

Consult your state Boards of Pharmacy for specific regulations, and check your local area for [American Society of Health-System Pharmacists](#) (ASHP) accredited pharmacy technician programs. For certification options, two organizations that offer certification include [Pharmacy Technician Certification Board](#) and [National Healthcareer Association](#).

For more details about how to become a Pharmacy Technician, go to [Pharmacy Technicians: Occupational Outlook Handbook: U.S. Bureau of Labor Statistics](#).

TRAINING LENGTH

600 HOURS

The American Society of Health-System Pharmacists (ASHP) accredits pharmacy technician programs that include at least 600 hours of instruction over a minimum of 15 weeks.

Registered Nurse

In the phlebotomist role can advance to phlebotomy specialist or donor phlebotomy technician roles. With additional experience and education, you can become a medical lab technician, medical assistant, or registered nurse (RN).

EDUCATION, TRAINING, AND OTHER REQUIREMENTS

Phlebotomists typically enter the occupation with a certificate from a postsecondary phlebotomy program, but some qualify with a high school diploma and on-the-job training. Employers may prefer to hire candidates who have earned professional certification. States may require that phlebotomists complete an accredited training program, have a license or certification, or meet other requirements. For specific requirements, contact your state licensing agency.

The [National Accrediting Agency for Clinical Laboratory Sciences \(NAACLS\)](#) and the American Society for Clinical Pathology (ASCP) are two organizations that accredit phlebotomy education programs.

For more information on how to become a phlebotomist, visit the [US Department of Labor's Occupational Outlook Handbook](#).

TRAINING LENGTH
LESS THAN 1 YEAR

A typical training program consists of classroom education, practical training, and an internship. A postsecondary non-degree award from a phlebotomy program usually takes less than one year to complete.

SIMILAR JOBS

A certified nursing assistant (CNA) can transition into jobs such as a home health aide, medical billing and coding, or certified medical assistant. CNAs can also become patient care technicians (PCT). Becoming a PCT enables a CNA to perform specific, higher-level nursing tasks. Additionally, they can work as travel CNAs. In this field, workers contract with travel nursing agencies for job placements.

CNAs who have completed 100 hours of pharmacology and medication knowledge training can pass an exam to become a qualified medication aide (QMA). A QMA administers medication to patients and monitors reactions, all under the supervision of licensed nursing staff.

EDUCATION, TRAINING, AND OTHER REQUIREMENTS

Certified Nursing Assistants (CNA) need to complete a state-approved education program, then pass their state's competency exam to become licensed or certified. State-approved education programs include both instruction and supervised clinical work. Each state has different standards for their CNA exam, but common tests include the [NCSBN exam](#), [Headmaster](#) and [Prometric](#). Most CNA exams are comprised of a written exam and skills evaluation.

For more information on how to become a CNA, review the [US Department of Labor's Occupational Outlook Handbook](#). You can also check with state certifying agencies for more information about your specific state requirements.

TRAINING LENGTH

75-180 HRS

Every state has its own minimum hour requirement and certification process. These requirements may vary by state but generally range from 75 to 180 hours in total. Programs may range from 4 to 12 weeks; most require 16 to 40 hours of clinical practice at a minimum. Learn more at [CareRev.com](#).
