SCSEP Monthly All Grantee Call (AGC), April 16, 2025

Burnett, Lauren S - ETA CTR 0:04
Ask that you keep your microphones muted throughout today's meeting to ensure seamless experience for everyone.
Back to you Ali.

Wilson, Toni K - SCSEP 0:13
Thank you so much, Lauren.
It's called.

+15*****42** 0:20
Hello, this is Alice.

Wilson, Toni K - SCSEP 0:20
It's like.

McNeace, Meche - ETA CTR 0:28
Somebody in your room might have their mic on if they are connected to the meeting invite from their laptop.

Slaughter, Alison S - ETA 0:44
Did it again. It didn't.
They muted everyone.
They can't do that, yeah.
How about now?

McNeace, Meche - ETA CTR 0:49
We hear you. Yay.

Mauro, Kevin M - ETA CTR 0:50
Yes.

Slaughter, Alison S - ETA 0:50
Awesome. All right.
Third time's the charm.
My name is Ali Slaughter and I work with SCSEP performance and reporting, and in the room here with me today, I have Toni Wilson, our Unit Chief.

I have Byron Kline, who is our NOL for regions 3, 6 and filling in for region 2.
I have Shawnte here on the line and also Jada in the room with me.
And if I can have our folks from our TwoTech contract give a big wave to everyone.
Thank you.
And then same with our BCT contract.
Great. Thanks everyone.
To start things off, I'm going to turn it over to Toni to talk about our PY 25 SCSEP allotment TEGL.

Wilson, Toni K 1:38
Well, good afternoon, everyone.
Once again, I am the SCSEP Unit Chief. For those that do not know me. So good to see everyone and happy April.
Hopefully things are going okay in your neck of the woods.
In reference to the allotment, we wanted to start out with that because I know that's probably the one of the biggest questions people are having. That is in our clearance process and is due out for May.
So as you know, with any kind of leadership transition, things can take just a little bit different route than we're used to.
So we are just managing that process, but the plan is May, and we will have.

Wilson, Toni K 2:31
Shawnte will walk through a few highlights in Irene's absence on that, so I'm going to pass that over to her.

Mcgee, Shawnte T - ETA 2:39
Thank you, Toni. As Toni stated, the PY 2025 TEGL is in the approval process. Our plan is to alert you as soon as it is approved. In the meantime, here are a few things you can do to be as ready for your submissions as possible.

Mcgee, Shawnte T - ETA2:57
State and national grantees if your indirect cost agreement and your cost allocation plan expires on or before June 30th, 2025, now is the time for you to apply for a new one.
Remember your approved IDC agreement or allocation plan must be submitted within 90 days of your PY 2025 award.
National grantees TEGL 1323 change one requires you to submit updated copies of your grievance termination and individual durational limit policies. If you have not done so, please submit them immediately to Grants.SCSEPDOCS@DOL.gov with a with copy to

your FPO. State grantees, we are coming across many out dated versions of policy, particularly your grievance policies.
You may be asked in response to the PY 2025 TEGL to submit updated versions of your of these policies, look at your grievance policies outdated if one as an appeal, it refers the grievance to the division of adult services.
The second one would be if your grievance process is not consistent with your organization chart. Grieving steps should be directed to an existing person title or division in your organization.
The last one is. If you have not updated your reference to the CRC here.

Mcgee, Shawnte T - ETA4:35
At DOL there were changes in the contact information that adds customer service, telephone and e-mail contact information.
Your IDL policy is updated if it only has seven waiver factors and your 8 waiver factors do not list formally incarcerated as an option.
Next, your termination policy is outdated. If you have not included the right to grieve the decision of the termination and does not reference your grievance policy and where to find it.
These are just some examples of what to look for to determine if your policy is outdated. So look at your policies, make the necessary edits, and have them ready for submission.
Lastly, the annual planning guidance TEGL is an opportunity for you to make any revisions to your FOA responses and state plan submissions.
Please review these to see if you need to make changes in your program or services and if you submitted a four-year ATSS, you may find that this is a great time to tweak your plan and make necessary adjustments to help you reach your goals. If you have any questions about these items, please contact your FPO and your NOL.
Back to you Ali.

Slaughter, Alison S - ETA 6:02
Thank you so much Shawnte.

Wilson, Toni K 6:03
Ali before you move on. Just one more thing I would add on that is that we do not plan to have any major changes to this TEGL, so I know as you guys are thinking and planning and awaiting for it to come out.
It is expected to be a pretty standard one, as we've seen in the past. So I just wanted to flag that.

And in the previous TEGL, I know this was a question that I've received through e-mail previously.
The last TEGL there was like additional funding.
So it was like four months and then eight months, we won't be having any of that.
So this will just be the full allotment, so I also just wanted to clarify that question if anyone has that.
But with that said, back to you, Ali, for.

Slaughter, Alison S - ETA 6:51
Thank you, Toni. And actually, I'll hand it back to you to go over our sector strategy grants update.

Wilson, Toni K 6:57
All right.
So then we also in reference to our sector strategy demo.
I know everyone has been eager in reference to the next steps with that. Once again, please just be patient with us as we go through all of our new kind of approval processes etc. as we transition with the leadership.
But the good news is that we have all cleared to go forward. And so, with that said, we are going to be sending out very shortly a meeting request for May 1st, which will be a check in meeting for all things on the demo.
So that agenda will include kind of an update of where things are.
We'll go over some FAQ's kind of questions around what might be expected in reporting.
Urban Institute will be on there to give kind of an update on the actual random assignment aspect of it.
And then on May 2nd, we will have a GPMS training on the Sector based Demo project.
That is specific on the fields in GPMS aspect of it.
So we'll be sending those out shortly.
The plan is that they're both around 2:00.
But we're just getting our final clearance before we can send that out. So hopefully that will be a space to answer everybody's questions and to move over.
We'll also have your FPOs will be invited to those calls just so you know.
And then the other thing or other two things I know it's one thing, but I'll mention it here.
The SCSEP peer-to-peer.
So there's a lot of things that are coming out and we've been really wanting to make sure we at least get one of these peer to peers before you guys get the TEGL in hand.
So what we've decided to do is that our next all grantee call, we are actually going to just add an extra half hour onto that call.

So instead of starting at 3, we would start at 2:30. We would do some business and then move into the peer-to-peer, which is the focuses on state and national grantees, some best practices on ways that they can collaborate and some tips and resources.
So we'll be doing a little bit of peer-to-peer discussion on that.
So hopefully most can make it, because it's our Standard Time and we will still do check in and reference the business etc. so people won't be, you know, won't miss that opportunity.
So hopefully that way we can include that you'll have that information as you get your TEGL, but hopefully either have your TEGL in hand at that time or shortly after.
And then the last thing I'm gonna just say it.
Now it's later in the meeting, but it's probably just best. We're not jumping around the GPMS training status, so I know you just heard me say in reference to those the demo.
So the next question is like, well, what about the rest of us?
So we are doing the GPMS training and once again just bear with us on these approvals.
But we should be sending it out any day now.
The meeting invite.
We're planning a lot pretty much weekly in May.
We had hoped to start at the end of April, but it may end up being the beginning of the May and we'll let you know that shortly. But basically, we will have modules, 3 different modules that will come out. The first one is basically around the excuse me, little notes here the.
Give me a second, overview and navigation and then we're looking at grantee administrator and sub grantee administrator admin console and then finally we'll have case management which will be broken up into three parts.
So we'll want to be able we'll put those on the calendars and then we'll make it so you can share it to the most appropriate to attend and then the good news is that they will be recorded. So if you're not able to make it, you'll be able to see the recording and for those that have sub grantees, for others that need to see it, then you can then just forward the recording and they can go forward with that.
So we hope to have that out very, very shortly, but that's what's upcoming there. So, with that said, unless there are some questions we can stop there.

Slaughter, Alison S - ETA 11:26
So there's a couple questions about policies and how to know if yours might be outdated or when you can expect to hear feedback. There's a question about asking to see examples of outdated policies.
We'll take that back as a team and discuss, but I would say in the interim, if you're unsure if your policy requires an update, you can go ahead and send that to your FPO

and they can help advise you on if that if any items in that need to be updated. Similarly, there's a question about if you've already submitted policies for review from the national, when can you expect to hear back?
You know you're going to work with your FPO, and they'll work with their National Office Liaison for that approval.

Wilson, Toni K 12:07
So for that one, I would just flag if you've already sent, we'll do kind of a when will you submit the allotment TEGL response.
That's when we'll do a sweep through.
So if we don't have one on file, you will get notified.
You'll have a chance then to submit it. So we'll look and see who did not.
And if there is anything that's kind of outdated or anything at that time, we'll contact you.
And those once again, stressing is good for the four years.
So we're just trying to make sure for the rest of the three years at this point, but we're just trying to make sure we have the correct information.

Slaughter, Alison S - ETA 12:46
Great. Thanks Toni.
And there was one last question about the service to minorities report, which is part of the TEGL submission process.
So that report which we call the minority report is provided by our office using GPMS data and census data, and that's in the works currently.
So you don't need to do anything to prepare for the report, but you'll use that data in your response to the TEGL
So I know Ron has this in his section a little bit later in our agenda, but we'll plan to provide that to grantees as part of their response to the TEGL.
All right.

Wilson, Toni K 13:21
Sounds good. Thank you.
Thank you, Ali.

Slaughter, Alison S - ETA 13:25
Thanks Toni.
Seeing no other questions, we can move on to our next section of the agenda grants management updates.

I have two performance items for you all.
The first is regarding the PY 23 Grant Performance Assessment, which was formally known as the Grantee Performance Evaluation.
So moving forward, we'll refer to that as the grant performance assessment.
We have received results back from wave three of the participant survey and also the host agency survey that connects to our effectiveness in serving participant host agencies and employers measure. So, we're wrapping that into the final.

Wilson, Toni K 14:07
This is a reminder. If you can please mute your phones.
Unfortunately, it does cost feedback. Thank you. Thanks.

Slaughter, Alison S - ETA 14:22
So we will.
We're wrapping that into the final evaluation and then we expect to be able to publish that very soon.
We are also working on a webcast.
We'll be recording that next week and then we'll publish that on the Community of Practice for additional information on, what is the Grant Performance Assessment and how is it calculated?
The other performance item is related to WIPS. The Workforce Integrated Performance System, which is the new system we have. We're transitioning to collect our performance data. It connects to GPMS.
We had training back in January and then we used the previous quarter as sort of a test quarter for grantees, both because we were still developing the system, but also it gave everyone a chance to be familiar before we move forward with using that system.
So we are going to be moving forward this quarter which is one quarter lag.
So we're looking right now reporting PY 24 quarter three to have all grantees submit their QPR Quarterly Performance Report and their QNR or Quarterly Narrative Report through that WIPS system, we are going to be sending out an e-mail notification telling grantees to go ahead and start testing your files. Those are all due on May 15th.
We're waiting for a confirmation from a test from a new release that went out today in the WIPS system.
But then we expect to have all grantees be able to submit that.
There are a few known issues in the system that will share with grantees as we continue to connect our two systems and work through some issues, but they're not issues that affect us being able to go through the wage matching process and we want to be able to get that data, start populating that data back to grantees as soon as possible.

So we'll move forward with having grantees submit this quarter and then we hope to have all those bugs fixed for our final quarter of the program year quarter four, which will be due in August 15th. We are going to have office hours again this quarter as well, so we have two planned for the first two weeks of May.
We're going to send those invites out shortly.
You'll get a lot of from us between GPMS training and WIPS, and we'll be able to use those to help support you get your files in the system.
I saw a message in the chat about when exactly will those be open?
You are able to test your file currently, so you can go ahead and submit those.
You may have to resubmit if we you know, just based on the test results that working through today.
So I would encourage you to wait till early next week, but if you want to go ahead and test a file, you can always submit a second one.
So that's not an issue, but you'll get an e-mail from us very shortly with that notification.
All right, I'm gonna.
I see a few other questions in the chat, but I'm gonna pause on those and we'll work to answer those throughout the rest of the agenda and at the end, I think a few of these are already on our list.
So with that, I will turn things over to the TwoTech team to go through our communications and TA section.

Mauro, Kevin M - ETA CTR 17:22
Thanks, Ali and thanks everyone for joining us this afternoon. As usual, I'll keep everything pretty quick cause I know we have a packed schedule this afternoon. We are continuing to keep the Community of Practice updated for you and given the sort of new processes we have in place for submitting new materials, we are highlighting some of the materials that we have already on the Community of Practice for you that you may have missed or may not have seen the first time around and so we want you to continue coming to the Community of Practice and making sure you're checking out, you know what we have.
We're also in the process of putting up a more step by step guide for making sure you are a full member of the Community of Practice as well as subscribe to Elerts.
And there is even a way to make custom Elerts if you want to be a pro user I suppose.
But that's all sort of forthcoming, and that's all I have for you on the Community of Practice this month. I can turn things over to Lauren, who will talk about the vLive updates.

Burnett, Lauren S - ETA CTR 18:35

Thanks, Kevin, and good afternoon again everyone. vLive continues to be a huge success with a high number of attendees each session and I want to continue to say thank you to the FPOs that continue to encourage your grantees to attend.
So we truly appreciate that and our last two meetings we have averaged about 80 plus attendees, which is super awesome, as we enjoy coming together with the grantees, they come with their questions and we come with the answers and or guidance and we all work together for a solve.
There are many times when the grantees help one another on our calls, which we think is great and shows us they are not only learning but absorbing what we share and we love to see the camaraderie. Last week we brought back GPMS trivia to start us off and it was a great way for everyone to engage and get their thinking caps on when it comes to GPMS and SCSEP.
The questions range from refreshers to anything that will really make you think. Our activities continue to be something that grantees enjoy.
And lastly, we posed the question why do you come to vLive and in summation, many attend to learn something new for community and for support, which makes us all feel warm inside.
So that's all I have for GPMS vLive updates back to you, Ali.

Slaughter, Alison S - ETA19:58
Thank you, Lauren, and thank you, Kevin.
All right. We will move to our GPMS update section.
So I will turn this over to Leila.

Lynch, Leila I - ETA CTR 20:08
Good afternoon, everyone.
We have some important topics to cover today, and they include the latest release, technical assistance and tip of the month.
We're successfully deployed release 3.4 in GPMS on Friday, April 11th. With this release, users with the role of grantee administrator can view a participant transfer and move history from the admin console via the card view transfer move history.
Users can now create custom default filters on the cases page.
Details of the release are available in the release notes found on the SCSEP health website.
A few grantees should have received an e-mail requesting they reallocate their APs for second quarter PY 24.
Please be sure to note the deadline for completing this task.
This allocation must be completed by Friday, April 18.

It is imperative that we meet this deadline as the freezing of the QPRs depends on the allocation being completed by this date.
That is Friday, April 18th.
Additionally, we would like to remind users that only those grantees in the pilot program should submit their help request tickets via the new help request module.
All other users must continue to submit their help request tickets via Zendesk.
Those grantees that are included in the pilot group have already been notified by e-mail.
We would like to remind grantee administrators that before changing a user's role to read only, it is crucial to reassign that user's case to another team member.
This ensures that participant cases can continue to be serviced by the grantee.
Similarly, before deactivating a user's account, the grantee administrator must reassign that users cases to someone else.
Again, this allows the participant cases to be serviced by the grantee.
Tip of the month.
This month's tip pertains to enrolling applicants in counties that grantees do not serve.
I'd like to remind grantees that new applicants cannot be enrolled in counties that the grantees do not serve.
Alternatively, these applicants can be referred to grantees that have authorized positions in the applicants county of residence or to their local American Job Center for job training and job search assistance. Thanks so much for listening.
I now turn the session over to Ron.

Ron Schack 24:01
Hi everybody.
So Ali did a great job and reviewing the status of the grant performance assessment.
And as she said, we are rolling the final ACSI scores into the assessment that will be published very shortly and at the same time, we are working on the minority report.
We've completed the participation analysis and are working on the outcome analysis now and that should be done by the end of April. So, you can use that for your response to the allotment questions and other than that, we are also working on the nationwide participant host agency survey form reports, and the grantee level form reports for those host agency and participant surveys and those will be out probably later in May.
And hopefully we'll have some kind of a subsequent webinar or something similar to review the results and how you can use them.
They can be very helpful in improving programming.
And that's all I've got.
Back to Ali.

Slaughter, Alison S - ETA 25:35
Thank you, Ron.
Thank you, Leila. Before we jump into our Q&A and our grantee highlight section, anything else from anyone in the team?

Wilson, Toni K 25:48
The only thing that I would say is if anybody has been emailing Steve Rietzke directly, he is currently on admin leave.
So please be sure to reach out to me.
And you know, I will help assist and work with our leadership.

Slaughter, Alison S - ETA 26:10
Thanks Toni.

Wilson, Toni K 26:11
Thank you.

Slaughter, Alison S - ETA 26:11
And Michi, I see you with your hand up.

McNeace, Meche - ETA CTR 26:12
I just want to quickly just acknowledge that we recently sent an e-mail to all the grantees that we will be starting the update of the Career One Stop Service Locator. So an e-mail did go out to everyone on Monday.

McNeace, Meche - ETA CTR 26:27
letting you all know that that process will be starting, and soon you all will be receiving your individual emails with the individual contact for your service area in all of the areas that you serve.
So I just wanted to just kind of bring that up today.
Thank you.

Wilson, Toni K 26:47
So Michi, you reminded me of something that I wanted to, that I would share.
It's just a tidbit, but we've been asked to speak at HUD.
Because there's been a lot of interest from public housing units, authorities, where the residents of the public housing are basically looking for resources like SCSEP.

So we are going to be providing a brief and we'll be working with the actual coordinators who will share this information.
So I just wanted to flag both in reference to what Michi's flagging. We get a lot of calls of people looking and we're able to identify kind of local resource and then this is another example where we'll really share where they can connect with your programs directly in reference to, you know, potential audience that you can enroll.
So just sharing the tidbit.
Thank you for what is.

Slaughter, Alison S - ETA 27:59
Thanks Toni.

Wilson, Toni K
Thanks, Ali, Michi.

Slaughter, Alison S - ETA 28:01
We did have one person in the chat mentioned that they didn't receive the e-mail.
So I will let you follow up on that one specifically, maybe offline.

McNeace, Meche - ETA CTR 28:10
Okay. So they were sent out to our grantee's two primary point of contacts.

Slaughter, Alison S - ETA 28:11
Great. Thanks for clarifying.

McNeace, Meche - ETA CTR 28:22
Alrighty.

Slaughter, Alison S - ETA 28:24
All right, so we are now at our grantee highlights and Q&A section.
We'll go through some of the questions in the chat, but while we are reading through those, is there anyone on the line that would like to share any highlights of what their grant has been up to in the past few months or else if you have a question, feel free to raise your hand and you can unmute and ask your question as well.
While folks are thinking about that, we'll go ahead and start with some of the questions in the chat.
We've addressed some of the questions already regarding the updating of policies.
Toni provided some additional information that I'll just read out loud.

Updated policies will only need to be updated or provided if you did not send a current version last year, we will review that we have current grievance, termination and individual durational limit policies after everyone has a chance to send in as a response to the upcoming allotment TEGL.
Thanks for that additional information, Toni.
We have. So Lisa, your question about Q2 data, have Lina talk about that in her section that we are hope to be able to provide a date and hope that that will be very soon.
It was related to the recent release we had last week 3.4, so we're hoping to have that be able to freeze that data very soon.
Someone stop me if you see hands otherwise, I'm going to keep going through with our questions in the chat.
Lisa, I see you have a hand.
Lisa, do you want to unmute yourself and ask your question?
Yeah.

Gerrard, Lisa 30:10
So, in relation to the freezing of quarter two, do you expect the same issue to occur if we try to do WIPS on our Q3 or the fix that just went in should alleviate anything? I guess what I'm getting at is, are there going to be any issues with Q3 that you think might be impacted?

Slaughter, Alison S - ETA 30:35
Great question.
Happy to report that there's separate processes so the WIPS freezing was more related to actually updating some of the authorized positions in the system.
So that's what we're working through now, so that issue is separate from the GPMS side or sorry from the WIPS side.
So we don't anticipate any issues with WIPS reporting anything for Q3.

Wilson, Toni K 31:07
I see that.
Ann, you added in the chat about the your digital certification program.
I thank you for flagging that this is a good chance to highlight.
You know, as I continue to mention, we're in that phase where there's transition.
So I'm not speaking to what the department's goals are, but I will say that so far there's been a lot of interest in digital literacy learning and so where we can provide some really great examples. We've been trying to do so, and we've been looking at that.
So we've definitely been highlighting that and where there are others, we've been

looking at your quarterly narratives and seeing whose kind of doing what in that space. But we've been sharing that. So just wanted to flag that and thank you to all that are in that space. And as a reminder, it's something that you want to get into.
ATSS is something that if you apply for ATSS at the first year, you can just continue. You don't have to unless you have something you want to modify.
It's good for your four years. If you didn't but now have decided there is something that you'd like to do.
You are still allowed to, and I say this meeting, when the TEGL comes out, that'll be the time to do it. But you're still allowed to make, you know, add that and make that adjustment.
Make that proposal so just want to flag that for those that might be interested moving into this space.

Slaughter, Alison S - ETA 32:31
Thanks, Toni, and thanks, Ann.
That's so great to see over 2000 skill tested digital certification.
So thank you for sharing that.
All right. I see Crystal with your hand up.
Crystal, you wanna unmute yourself?

Crystal Odom-McKinney 32:49
Hi, yes, good day. Good day everybody. Regarding the sector strategy grant.
Thanks for the updates.
Thanks for providing that information.
We have met with Urban Institute and we're getting timelines and deliver what we're getting asked about timelines and deliverables and there is a little bit of a disconnect because there's nothing to report on because we don't have our instructions, if you will, so we're waiting on that.
So when we had our January meeting, they said, are you ready to start in March? And then we had our meeting this month and they're like, well, who are your OJT employers? So it's a little bit.
I'm glad we're meeting because as the others are probably experiencing too, it's been a little difficult to navigate and report on anything. And with that being said, we're approaching our quarterly reports and there's nothing to report on because we haven't moved. So, with that being said, I'm just gonna kind of say in closing a little bit of disconnect with Urban Institute and what was happening here because we got dates for trainings.
One was this week supposedly, and then one, the alternate date was the end of the

month.
And now we're hearing today that it's gonna be in May. So just wanted to provide that feedback.

Wilson, Toni K 34:12
Well, no, thank you very much, Crystal.
So I just want to reiterate that as I said, in a transition time, there's just been a lot of things that have been kind of pulled back, put on pause or delayed.
So that's just basically what we're experiencing.
Unfortunately, it's just out of everybody's control there and now we have received the those kind of go forward on some of these pieces, so we couldn't go forward until they finished their calls of all nine grantees, which that's what was put on hold.
So they have now finished or are finishing up in the next few weeks. And then from there we can now have that call going forward.
I also just want to remind you, because I know this, can you know, we think in the sense of how we do the SCSEP program.
This is a four-year grant, so it's not looked at on that kind of annual basis. It'll be looked at as the four year piece of.
So we are completely aware of like when you're starting, when things are kind of being able to go forward.
And so if there is any work, you know, definitely put that in the narrative.
But we definitely understand you wouldn't be penalized if nothing has started yet because of the state of where the program is.

Slaughter, Alison S - ETA 35:33
Thanks Toni.
Thanks Crystal.
All right. There are no more hands.
I'm going to move back to our chat for a second, but again, if you have anything else to share, please raise your hand.
Have a question from Deb in the chat about wage data entering both in GPMS and then it also being through WIPS.
Deb, I'm gonna look more into your first comment about wage data in GPMS before I provide an answer on that.
So I'll follow up with you offline and we can report out to all grantees on that.
I know that affects everyone.
What I will say is that yes, when we can get connected to WIPS and we can go through that wage matching process which is what we hope we can do this quarter with

everyone's submitting . You'll see two values in WIPS you'll see one called supplemental, which is anything reported in GPMS, that for anyone that had wages either the median earnings amount or like just saying yes, that they had wages in the system.
And then the second number you'll see is a combined figure and that takes anything gathered in the wage matching process. And then anything else in supplemental that wasn't included in the UI wage match and it gives you a new figure.
So you'll be able to see that difference between what was reported in GPMS through follow up and then what was found through wage matching.
So be able to compare those results, but in terms of actually entering wages in GPMS from like a state UI database. I'm going to look more into that and then get back to you on how to move forward with that. But through WIPS, you'll be able to get all that data because your state signed on to the WIPS wage matching agreement. A great question.
And I did also see a comment about a GPMS enhancement.
Any enhancements can be sent to our Zendesk.
The more folks that request something higher up on our list, we can try to move it in terms of what comes next in our design.
So if that is something that also looks like would be helpful to you as a grantee, feel free to submit a Zendesk ticket and we'll add it to our list for enhancements.
All right. There was a comment about updating a TEGL 1713.
Unless anyone has a yeah, so.

Wilson, Toni K 38:05
So right now, that is the policy.
There isn't, at least the immediate future to update, but it is on the radar, and we'll keep you posted on that. So, thank you for flagging that and I'll make sure that I continue to flag that for our leadership.

Slaughter, Alison S - ETA 38:26
Thanks Toni.
Just a request to be included in the information about wage matching in GPMS.
We'll definitely show that with you, Lisa.
And we'll report that out to all our WIPS users as well. So, we can make sure everyone is reporting the same.
Alright, we have last question in the chat right now from Jeff in the recent 3.4 release, it mentions that if anyone was enrolled in SCSEP prior to 2007, they can now enroll again for up to four years.
I'm just making sure that I read, understand this correctly. If a participant has

exhausted their time prior to 2007, that has now been reset.
Is anyone in the team able to answer that?

Lynch, Leila I - ETA CTR 39:09
That's correct.

Wilson, Toni K 39:10
Yeah.

Lynch, Leila I - ETA CTR 39:11
The four years do not begin to count until after the 2007.
So yes, it's reset.

Slaughter, Alison S - ETA 39:17
Got it.
Great. Thanks, Leila.
Thank you.

Lynch, Leila I - ETA CTR 39:23
You're welcome.

Slaughter, Alison S - ETA 39:26
And it sounds like the enhancement that was in the chat is maybe already something that was done in the system.
So I am glad to hear that.
All right.
Maybe that was a release on just on Friday.

Wilson, Toni K 39:35
All right.

Slaughter, Alison S - ETA 39:36
Any other questions or updates?
Oh, you were hoping it would also include that?
All right.
Well, again, please submit as Zendesk ticket and we'll see if we can include that as well.

Any other questions, comments.
Yes, Christine.

Christine Garland 40:00
Hi, I'm sorry.
Can you explain again the 2007 thing?
The cap is four years.

Lynch, Leila I - ETA CTR 40:10
The four years.

Christine Garland 40:10
I've been around since before 2007, so this is, I'm very curious. I'm confused.

Lynch, Leila I - ETA CTR 40:20
The cap of four years began after 2007, so participants in the program prior to that did not have a limit.
But after that day, the limit became four years. Does that help?

Christine Garland 40:30
Yes.
Correct.
Yeah. So that's all you're saying.

Lynch, Leila I - ETA CTR 40:36
Therefore if.

Christine Garland 40:38
So it sounds like the question was, do they get four more years and that's?

Lynch, Leila I - ETA CTR 40:39
That's all I'm saying.
They get four years if they enroll in the program today, even though they were in the program before 2007.
Because there was no limits before 2007.
Christine Garland 40:58
No, I understand. okay.

I got it.
Thank you.

Lynch, Leila I - ETA CTR 41:01
Okay.
You're welcome.

Slaughter, Alison S - ETA B 41:04
Thanks, Leila.
Thanks Christine.

Lynch, Leila I - ETA CTR 41:05
You're welcome.

Slaughter, Alison S - ETA 41:10
All right.
Anything else?
Our next all grantee call is Wednesday, May 21st and again we're planning right now to include a peer-to-peer.
So we'll be extending that time and you'll see that calendar invite as well as a few other in your inbox soon related to GPMS training and WIPS office hours.
But if there is nothing else, it was wonderful to see everyone and we look forward to seeing you in May.
Thank you.

Lynch, Leila I - ETA CTR 41:40
All right.

Wilson, Toni K 41:41
Thanks, SCSEP. Appreciate everyone.
You have a good one.
Thank you.
Bye.
