Video Title: Saving WorkforceGPS Content

Scene 1:

Audio: [high-pitched tones]

Video: WorkforceGPS logo

Scene 2:

Audio: This brief video answers the question: How do I save WorkforceGPS content?

Video: How do I save WorkforceGPS content?

Scene 3:

Audio: Every content page includes the option to save. When you have located a piece of content you want to save, select the Save button. If you are not already logged into your WorkforceGPS account, you will be prompted to sign in. After signing in, the content page you visited will load, and now you can save the content.

Video: WorkforceGPS homepage with the caption "Select" and the Save button highlighted with a blue rectangle. A dialog box reminds the user to sign in to save this content. After signing in, the content page has the caption "Select" and the Save button highlighted in a blue rectangle.

Scene 4:

Audio: After selecting the Save button, the button will update to Saved. For any content that you have saved, you can select the button to remove it from your saved content.

Video: The content page has the caption "Select" and the Save button highlighted in a blue rectangle before it changes to Saved.

Scene 5:

Audio: To access your saved content, select your name at the top right of the page and then select the My WorkforceGPS button. Select My Content from the menu on the left to access all saved content from WorkforceGPS and its communities. Content is sorted by the date you saved it, with the most recent at the top of the list. If a content item is no longer of interest to you, you can select the Remove button located to the right of it. Thanks! We look forward to connecting with you again!

Video: Content page and profile with caption "Select" highlighting the My WorkforceGPS button. On the left menu, a caption "Select" highlights the My Content setting with a blue rectangle. Content item with caption "Select" next to the Remove button highlighted with a blue rectangle.

Scene 6:

Audio: [high-pitched tones]
